Enabling PCs for Broadcast

The best way to predict the future is to invent it.

Alan Kay

DekTec designs and manufactures PC add-on cards, USB- and IP devices, and software for the professional digital-television market. Our devices can be used in three ways

1. For Test & Measurement purposes;

2. To build broadcast infrastructure;

3. As OEM component integrated in your product.

We are pleased to see that our products are widely deployed by virtually every company operating in the digital-television field. The future looks bright, with a roadmap loaded with exciting new products.

Sito Dekker

The astonishing advances in PC technology have enabled the creation of real-time applications never thought possible. DekTec supplies the missing pieces to build complete applications in the form of interface adapters to route digital-TV signals in and out of the PC, and optimized software components to perform the signal processing. The economy of scale provided by the PC platform, combined with DekTec's multi-purpose interface devices and software, enable an exceptional price to performance ratio.

It is our mission to provide digital-TV professionals with innovative, best-in-class hardware and software to successfully deploy PCs in digital-television solutions.

A Short History

DekTec was founded in 2000 by Sito Dekker and Maarten Ghijsen, who both learned the trade at Philips Electronics, the pioneer of digital television. In the early years, several PCI bus adapters were brought to the market. In 2004, the first FantASI USB device was introduced, along with the *StreamXpress*® playout software and *StreamXpert*® transport-stream analyser, quickly evolving into the industry-standard test-and-measurement toolset for digital-TV lab and field work.

Also in 2004, the first test modulator was developed, the DTA-107 satellite modulator for PCI bus. Several modulators followed over the years, until in 2015 the modulator line was

completed with two high-end test modulators, supporting all current cable, terrestrial and satellite standards: The portable DTU-315 for USB-3, and the DTA-2115B for PCIe, which can modulate up to eight 8-MHz channels simultaneously.

An extraordinary achievement in applying software technology was completed by Fabrice Bellard, who started working for DekTec in 2006. He developed software-defined modulators and receivers for nearly all digital-TV modulation standards, running on standard x86 processors. This has enabled DekTec to become the leading supplier of test modulators and receivers, and be actively involved in the development of standards like DVB-T2 and ATSC 3.0.

In recent years, the development focus has shifted to products for developers (OEM). An extensive range of PCIe cards for ASI and SDI interfacing has been created, together with the state-of-the-art DekTec Matrix API® for real-time audio/video processing on PC hardware. Several video-over-IP cards, supporting the same DekTec Matrix API®, are in development and will be introduced in 2017.

In the 17 years of its existence, DekTec has proven to be an independent and stable company with a complete and consistent product portfolio. An increasing number of customers rely on DekTec digital-television products for test & measurement, and in 24/7 operational environments.

Organisation

All hardware products are manufactured in the Netherlands. DekTec has built up a sizeable engineering and distribution force, with its head office in Hilversum, two wholly owned sales offices in USA and UK, and development centers in Hilversum, Eindhoven and Denver. More than 40 appointed distributors cover all regions in the world.

DekTec is a member of DVB and ATSC and a registered member of HDMI, IABM, PCI-SIG, SMPTE, USB Forum and VSF.

What's New in 2017

- **DTA-2153**

  An attractively priced PCIe card with three HD-SDI inputs, one HD-SDI output and an HDMI-monitoring port.

- **DTA-2175**

  A tiny PCIe card with 3G-SDI/ASI input, output and a failover relay.

- **DTA-2178**

  An economically-priced low-profile PCIe card with eight 3G-SDI/ASI ports.

- **DTA-2182**

  A dual-encoder version of the DTA-2180, for encoding two HD or SD channels using H.264 or MP2V.

- **DTA-2184**

  A broadcast-quality HEVC encoder for audio/video encoding of one UHD channel or four full-HD channels simultaneously.

- **DTA-2195**

  A PC interface for 12G-SDI and HDMI 2.0.

- **DTM-3204**

  An OEM module for converting IP to four ASI ports.

Strive not to be a success,
but rather to be of value.

Albert Einstein

DTA-2107

Multi-Standard L-Band Modulator

PCI Express

Features

- Satellite modulator with integrated agile L-band upconverter
- DVB-S and DVB-S2 modulation with support for all constellations (incl. 16APSK and 32-APSK) and all roll-off factors (0.20, 0.25, 0.35)
- ISDB-S modulation option with command-line multiplexer to create a valid ISDB-S stream with TMCC data from a standard Transport Stream
- Programmable output level
- AWGN inserter option
- Free Windows and Linux SDK (DTAPI) is fully compatible with other DekTec digital-video output adapters
- PCI Express x1, low profile
- Low profile and standard profile PCI brackets available

Applications

- With *StreamXpress*®: Multi-purpose satellite-TV RF signal-generator for R&D, demos, exhibitions, repair
- With MuxXpert: Real-time generation of a DVB-S(2) / ISDB-S signal for single Transport Streams
- With DTAPI: Create your own OEM application that generates a satellite-TV RF signal

Complete DVB-S(2), ISDB-S modulator
Fully agile from 950 to 2150 MHz
AWGN insertion

Key Attributes

Parameter	Value
Modulation	DVB-S(2), ISDB-S, DAB+, I/Q
DVB-S2 constellations	QPSK, 8PSK, 16/32APSK
Roll-off factor	0.20, 0.25, 0.35
Channel filter	256 taps
Symbol rate	0.088 to 45MBd
Symbol rate resolution	<30mBd
Output connector	75-Ω F female
Return loss	>14dB (950 to 2150MHz)
RF output frequency	950 to 2150MHz
RF output level (DVB-S2)	-46.5 to -15.0dBm
RF output level (DVB-S)	-41.5 to -10.0dBm
Phase noise	<-95dBc @ 10kHz
Spurious	>50dB (950 to 2150MHz)
PCI Express	PCIe1 x1 low profile
OS	Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

Modulation Standards

Modulation	Standard
DAB+*	EN 300 401
DVB-S	EN 300 421
DVB-S2	EN 302 307
I/Q*	Arbitrary I/Q samples
ISDB-S*	ARIB STD-B20

* Option

Ordering Information

Type	Description
DTA-2107-SP *	L-band modulator with *StreamXpress*®
DTC-305-CM	AWGN inserter option
DTC-371-IQ	IQ sample playout option
DTC-373-IS	ISDB-S modulation option
DTC-376-DAB	DAB modulation option

* Supports DVB-S and DVB-S2

DTA-2111

Multi-Standard VHF/UHF Modulator

PCI Express

Features

- Multi-standard modulator for PCI Express with support for most QAM-, OFDM- and VSB-based modulation standards
- Digital upconversion for excellent signal quality without need for calibration
- Supports all constellations and modulation modes for each supported standard
- All-channel upconverter 36 to 1002MHz fully agile over VHF and UHF band
- Digital channel simulator option
- RF output for direct connection to the antenna input of a digital receiver
- Free Windows and Linux SDK (DTAPI) is fully compatible with other DekTec digital-video output adapters
- PCI Express x1, low profile

Applications

- General purpose test modulator
- SMATV, hotel server, shows and exhibitions
- OEM applications

All-digital multi-standard modulator
Fully agile from 36 to 1002MHz
Upgradable to support new standards

Key Attributes

Parameter		Value
RF connector		75-Ω F female
Frequency range		36 to 1002MHz ±3ppm
Bandwidth (max)		8MHz, 16MHz (option)
I/Q sample rate		4.7 to 9.375MHz
Level	Range	-32 to -9dBm (QAM) -35 to -12dBm (OFDM)
	Step size	0.1dB
	Accuracy	±2dB
MER		>40dB
Adjacent channel		-54dB (QAM) -52dB (OFDM)
Phase noise		<-95dBc @ 100kHz
Spectral purity		>50dB @ -9dBm
Wideband noise		35dBµV (B=1MHz)
PCI Express		PCIe1 x1 low profile
OS		Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

Modulation Standards

Standards
ADTB-T*, ATSC, ATSC-M/H*, CMMB*, DAB+*, DMB-T/H*, DVB-C, DVB-C2*, DVB-T, DVB-T2*, I/Q samples*, ISDB-T*, ISDB-Tmm*, QAM-B, QAM-C, T-DMB*

* Option

Ordering Information

Type	Description
DTA-2111-SP	VHF/UHF modulator with *StreamXpress®*
DTA-2111-GOLD	DTA-2111 with all options
DTC-371-IQ	I/Q sample playout option
DTC-380-16MHZ	16-MHz bandwidth option
DTC-381-T2SPLP	DVB-T2 single PLP option
DTC-382-Tmm	ISDB-Tmm option
DTC-384-SWMC	Multi-channel software modulation option

Back to content

DTA-2115B

All-Standard, All-Band Modulator

PCI Express

Features

- High-end test modulator for PCIe with support for all popular digital-TV modulation standards
- All-digital modulation
- Wideband upconverter 32 to 2186MHz, fully agile over VHF, UHF and L-band
- Digital channel simulator option including multipath echo and phase noise simulation
- Ultra low phase noise
- 10-MHz/1pps input for SFN operation or board-to-board synchronization
- Free Windows and Linux SDK (DTAPI) is compatible with DekTec's other modulators and digital-video output adapters

Eight-Channel Firmware

- With the DTC-385-HW8CH option, the DTA-2115B operates as eight independent 8-MHz modulators
- Each modulator is fully agile over the VHF and UHF band (no dependencies between modulators)
- Any combination of terrestrial and cable modulation standards is supported

Applications

- The ultimate test modulator in the lab
- Generation of a network of channels in a test and validation environment using *StreamXpress®*
- Play back of I/Q samples up to 72MHz bandwidth

Fully agile from 32 to 2186MHz
Single 72-MHz or eight 8-MHz channels
Supports new DVB-S2 extensions (DVB-S2X)

Key Attributes

Parameter		Value
Main output	RF connector	50-Ω SMA female
	RF level	-60 to 0dBm
	Step size	0.1dB
Monitor output	RF connector	75-Ω F female
	RF level	-45dBm
10-MHz/1pps input		2x 50-Ω BNC female
Frequency range		32 to 2186MHz
Symbol rate		88kbd to 85Mbd
I/Q sample rate		88kHz to 85MHz
Bandwidth (max)		72MHz
Transmit MER (typical)		42dB
Phase noise		<-110dBc @ 10kHz
Spectral flatness over 8MHz		0.5dB
Spectral purity		>50dB
PCI Express label		PCIe3 x1
OS		Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

* If the DTA-2115B is used in a PCIe gen 2 slot, certain sample rate restrictions will apply.

Modulation Standards

Standards
ADTB-T*, ATSC, ATSC-M/H*, ATSC 3.0*, CMMB*, DAB+*, DMB-T/H*, DVB-C, DVB-C2*, DVB-CID, DVB-S, DVB-S2, DVB-S2X*, DVB-T, DVB-T2 single PLP, DVB-T2 (full)*, I/Q samples*, ISDB-S*, ISDB-T*, ISDB-Tmm*, QAM-B, QAM-C, T-DMB*

* Option

DTA-2131
Multi-Standard VHF/UHF Receiver

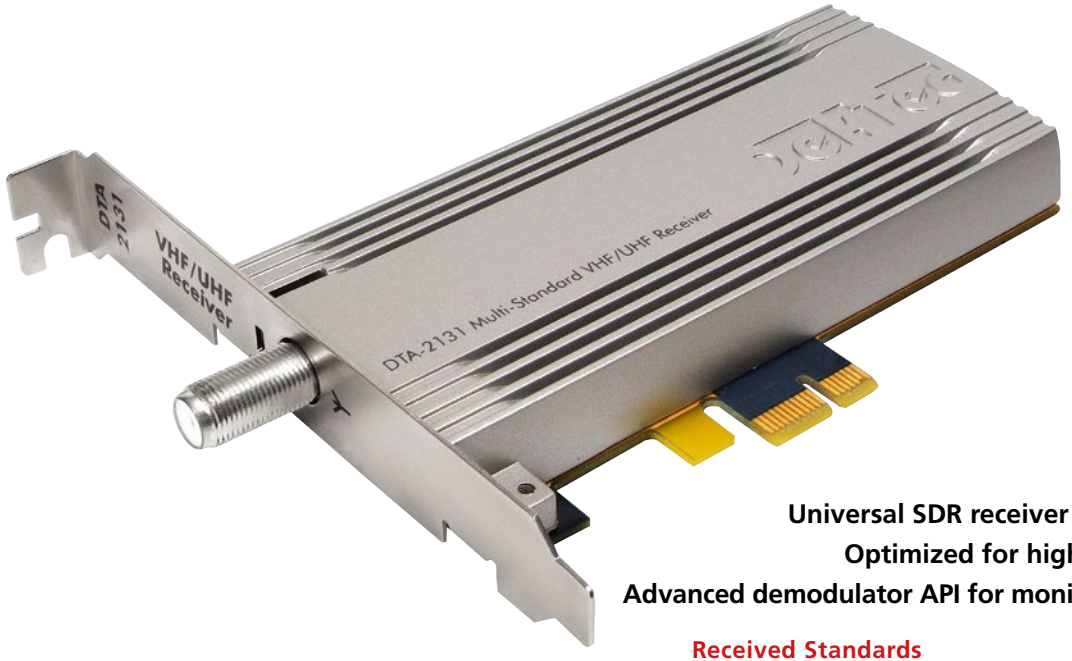
PCI Express

Features

- Tuner, I/Q demodulator and sample-rate converter, optimized for use with SDR technology (Software Defined Radio = demodulation in software)
- Several software demodulators available, including ATSC 3.0, DVB-C2 and DVB-T2, with features and measurements exceeding those of consumer demodulator chips
- Hardware sample rate converter for obtaining I/Q samples at a convenient rate (requires DTC-361-IQ option)
- MER measurements in OFDM up to an accuracy of 42dB
- Multiple demodulated streams and advanced measurements available through Advanced Demodulator API (available for Windows and Linux, part of DTAPI)
- PCI Express x1, low profile
- Low profile and standard profile PCI brackets available

Applications

- RF network monitoring with measurements
- Universal receiver
- Front end for SDR experiments



Universal SDR receiver for VHF/UHF band
Optimized for high-quality reception
Advanced demodulator API for monitoring applications

Key Attributes

Parameter		Value
RF input		75-Ω F female
Input return loss		>8dB
Tuning range		42 to 870MHz
Bandwidth		1.7, 6, 7, 8, 10MHz
Input sensitivity		-90 to -20dBm
I/Q sample rate		1.25 to 40Msps
I/Q sample size		16-bit I + 16-bit Q
SNR		50dB
Metrology	MER	10 to 42dB
	RF level	-90 to -20dBm
	RF level accuracy	±3dB
Power consumption		4.7W typ
Environmental temperature		0 to 45°C
PCI Express		PCIe1 x1 low profile
OS		Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

DTA-2136

Dual QAM-A/B/C Receiver with ASI Monitoring Ports

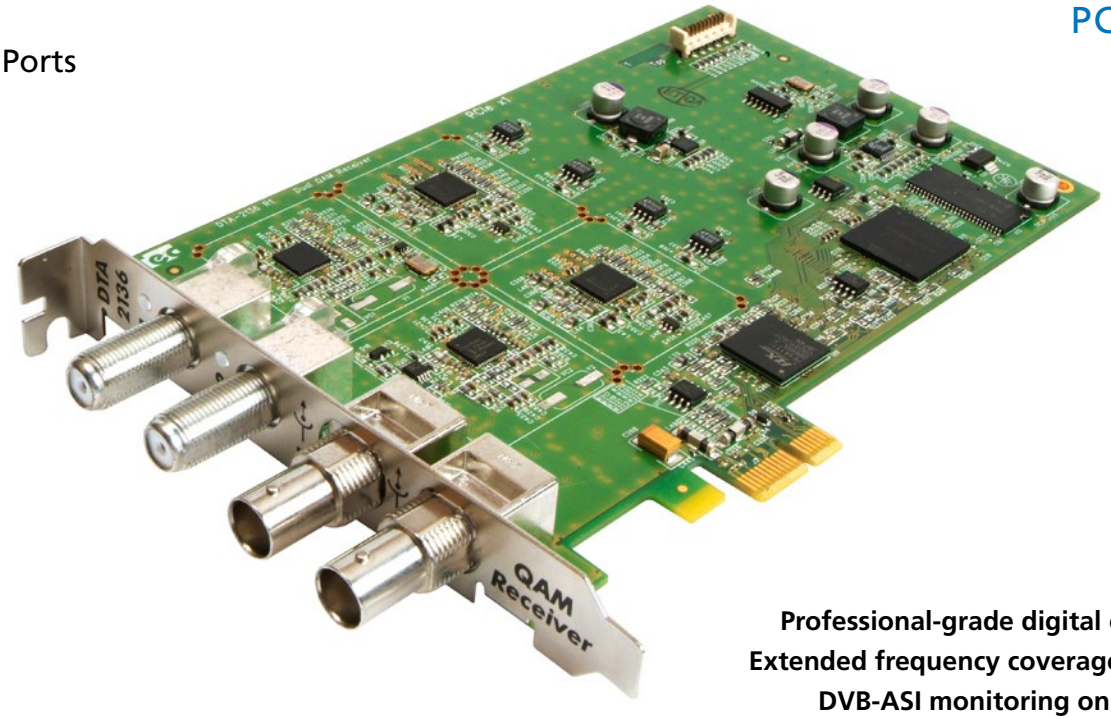
PCI Express

Features

- Dual-channel QAM receiver, compliant with J.83 Annex A (DVB-C), B and C
- Applications have access to the complete Transport Stream
- Two DVB-ASI output ports for monitoring the receiver output
- ASI ports can also be used as independent general-purpose ASI outputs
- Each channel provides reception status, RF level, demodulation status, constellation, SNR, MER, pre- and post-FEC BER
- Free Windows and Linux SDK (DTAPI) is fully compatible with other DekTec digital-television adapters
- PCI Express x1

Applications

- Monitoring of cable networks (with *Xpect*®)
- Professional cable receiver



Professional-grade digital cable receiver
Extended frequency coverage to 1002MHz
DVB-ASI monitoring on each channel

Key Attributes

Parameter		Value
RF inputs		2x 75-Ω "F" Female
QAM standard		J.83 Annex A/B/C
Input return loss		>10dB
Tuning range		54 to 1002MHz
Input sensitivity		-60 to -30dBm
Symbol rate		5.0 to 7.1MBd
Metrology	RF Level	-60 to -30dBm
	SNR	10 to 30dB
	MER	10 to 30dB
	BER	Pre/Post
	Constellation	2D
Receive-buffer size		2x 8MByte
PCI Express		PCIe1 x1
OS		Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

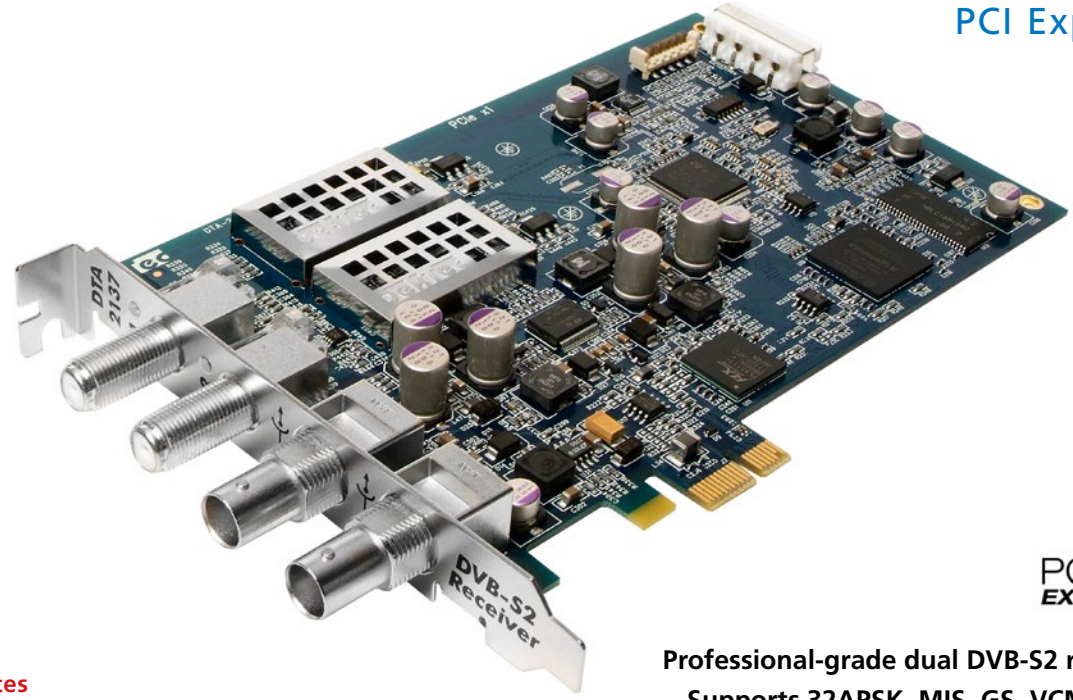
DTA-2137C

Dual DVB-S2 Receiver with ASI Monitoring Ports

PCI Express



Features

- DVB-S2 receiver supports two channels in QPSK / 8-PSK mode or one channel in 16-APSK / 32-APSK mode
- Two ASI output ports can be used for monitoring or as independent output
- Reception and forwarding of BBFRAMEs
- Supports advanced DVB-S2 features: VCM, ACM, multiple input streams (MIS) and Generic Stream (GS)
- Dual LNB inputs or shared feed
- DVB-S2 demodulation compliant to EN302 307 and EN301 210, as well as legacy DVB-S support
- Implements all DVB-S2 modulation types including 16APSK and 32APSK
- Full LNB support with DiSEqC interface and 13V/18V 200mA supply (PCIe power) or 400mA with external power
- Each channel provides reception status: RF level, demodulation status, modulation type, code rate, MER, BER and error counts
- Programming interface (DTAPI) is fully compatible with other DekTec Digital-Video input adapters
- PCI Express x1

Applications

- Multipurpose DVB-S2 receiver
- Satellite data distribution
- Local redistribution of DVB-S2 channels with DekTec's remultiplexer MuxXpert

Professional-grade dual DVB-S2 receiver
Supports 32APSK, MIS, GS, VCM, ACM
DVB-ASI monitoring on each channel

Key Attributes

Parameter		Value
Antenna inputs		2x 75-Ω "F" Female
Input return loss		>10dB @ 0 to 1GHz > 4dB @ 1 to 2GHz
Tuning range		950 to 2150MHz
Input sensitivity		-60 to -30dBm
Baud rate		2 to 40MBd
Metrology	RF level	-60 to -30dBm ± 3dB
	SNR	0 to 22dB ±2dB
	MER	0 to 22dB ±2dB
	BER (DVB-S2)	Post BCH; Post LDPC
	BER (DVB-S)	Pre Viterbi; Pre RS
	Constellation	256 x 256
LNB supply (per channel)		13V/18V 400mA*
Receive-buffer size		2x 8MBytes
PCI Express		PCIe1 x1
OS		Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

* 200mA without 12V connected on HDD power connector

DTA-2138B

DVB-T2/C2/ISDB-T Receiver

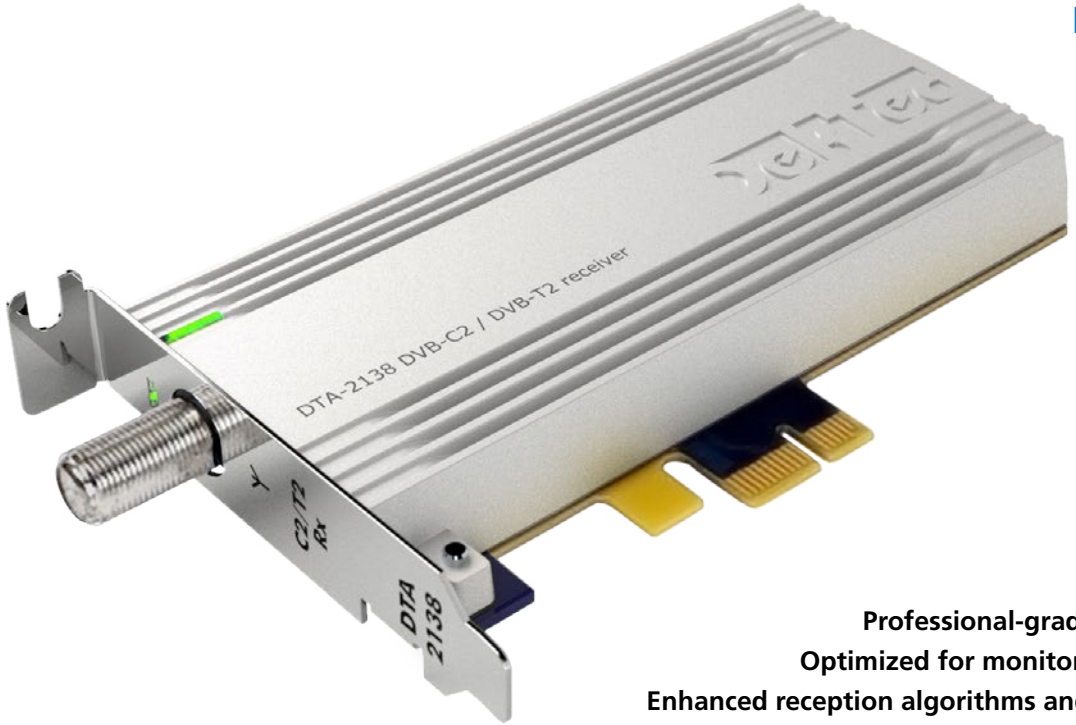
PCI Express

Features

- Single-channel DVB-T2, DVB-C2 and ISDB-T receiver for VHF/UHF with support for DVB-T2 Lite
- Full support for legacy DVB-C and DVB-T
- Hardware-based demodulation with 0% CPU load
- Support for all DVB-T2 modes, including single and multiple PLP, SISO and MISO
- Professional RF measurements including RF level, MER and constellation diagram
- Free Windows and Linux SDK (DTAPI) is fully compatible with other DekTec digital-television adapters
- PCI Express x1, low profile
- Low profile and standard profile PCI brackets available

Applications

- Monitoring of DVB-T/T2, DVB-C/C2 or ISDB-T networks
- DVB-T/T2, DVB-C/C2, ISDB-T test receiver
- Re-multiplexing of DVB-C/T/C2/T2 or ISDB-T with DekTec's *MuxXpert* software



Professional-grade T2/C2 receiver
Optimized for monitoring applications
Enhanced reception algorithms and measurements

Key Attributes

Parameter	Value
RF input	75-Ω "F" female
Input return loss	>8dB
Tuning range	42 to 880MHz
Bandwidth	1.7/5/6/7/8 MHz
Input sensitivity	-80 to -15dBm
DVB-C	EN 300 429
DVB-C2	EN 302 769
DVB-T	EN 300 744

DTA-2139

Twelve-channel QAM-A/B/C receiver

Features

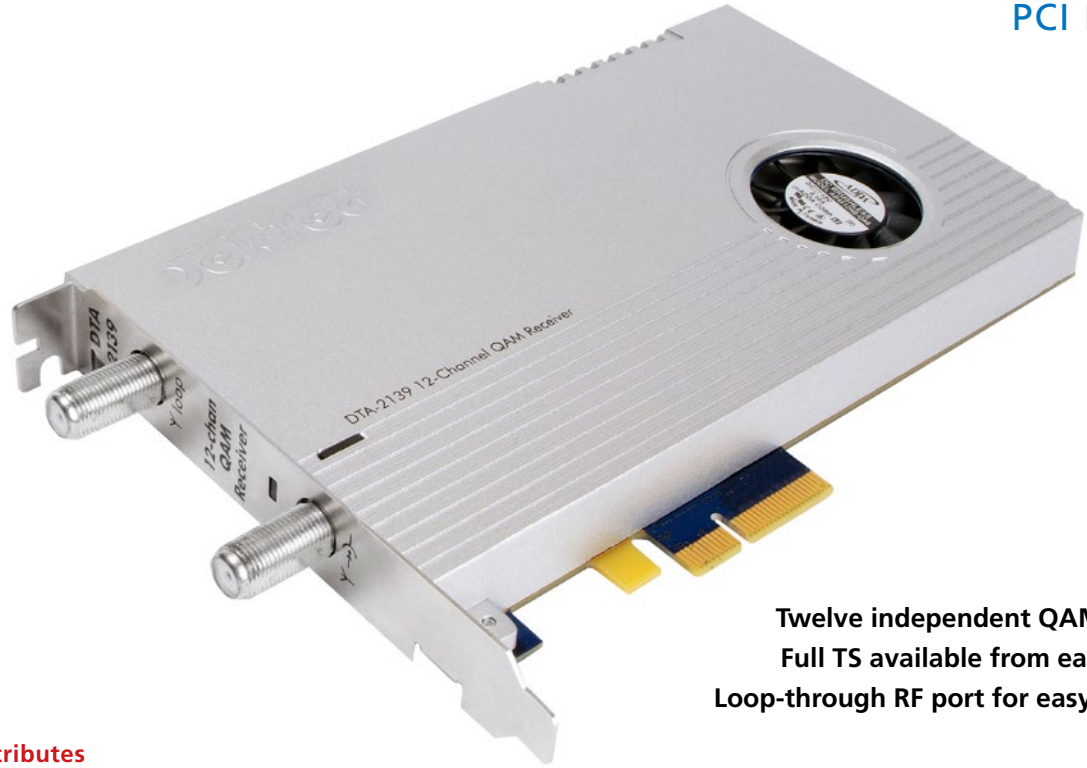
- High-density QAM-A/B/C receiver card with twelve independent receivers
- Applications have access to the complete Transport Stream for each channel
- RF signal is available on a loop-through output that can be connected to another DTA-2139. By cascading multiple DTA-2139s, a complete QAM network can be monitored
- Each channel provides reception status, RF level, demodulation status, constellation, SNR and post-FEC BER
- PCI Express x4
- Free Windows and Linux SDK (DTAPI) is fully compatible with other DekTec digital-video output adapters

Applications

- Monitoring of cable networks with Xpect®
- Testing and validation of edge-QAM systems

Note

This card can output the full Transport Stream but it cannot descramble services



Twelve independent QAM receivers
Full TS available from each receiver
Loop-through RF port for easy cascading

Key Attributes

Parameter		Value
Input connector		75-Ω F female
Return loss		>10dB
Loop-through connector		75-Ω F female
Loop-through attenuation		1.5dB typ.
Tuning range		54 to 1002MHz
Input sensitivity		-55 to -30dBm/channel
Symbol rate		5.0 to 7.1MBd
Metrology	RF level	-50 to -30dBm
	SNR	10 to 30dB
	BER	Post
	Constellation	2D

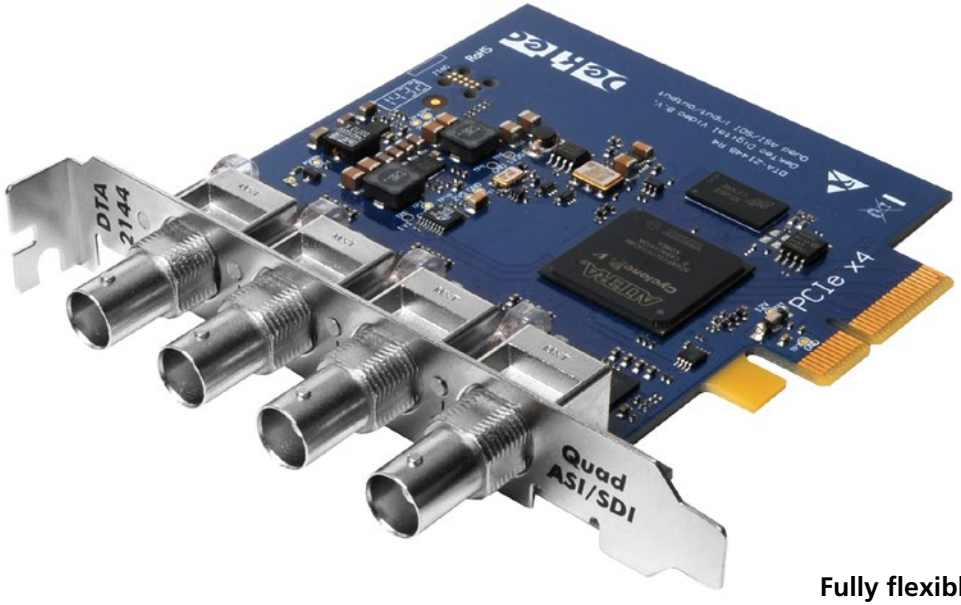
DTA-2144B
Quad ASI/SDI Adapter



Fully flexible port configuration
PCI Express x4 for ample bandwidth
Supports DVB-ASI and full-frame SDI

Features

- Four ASI/SDI ports with individual status LEDs
- Each port can be independently configured as input, output or copy of another channel
- Cable equalisation and inverted ASI
- Support for genlock
- Hardware counters for bitrate measurement and statistics
- Flexible receive modes with time-stamping, packet sequence counting and false-sync pass through for full TR 101 290 support
- 10-bit SDI, full stream @ 270Mbit/s
- Lossless SDI Huffman encoding / decoding for reduction of bus bandwidth
- PCI Express x4

Applications

- Transport-stream multiplexing
- Monitoring of multiple MPEG-2 transport streams and/or SDI serial digital video streams
- Universal ASI/SDI input/output adapter for PC-based applications that record, play and/or process ASI or SDI

Key Attributes

Parameter		Value
ASI/SDI connector		75-Ω BNC (4x)
Input return loss		>15dB
Hardware buffering		32MB/channel
ASI	Physical layer	DVB-ASI (coax) EN50083-9
	Rx or Tx bitrate	0 to 214Mbit/s
	Resolution	<1bit/s
SDI	Physical layer	SMPTE 259M/C
	Bitrate	270Mbit/s
	#Bits	8 or 10bit
PCI Express		PCIe1 x4
OS		Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

DTA-2145

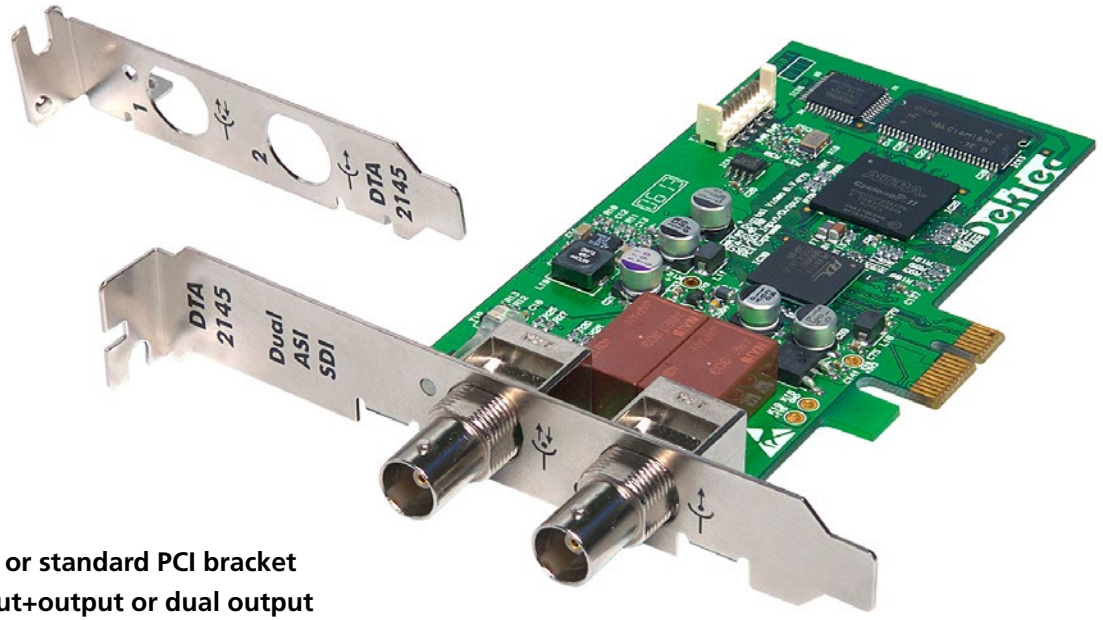
Dual ASI/SDI Adapter

Features

- Two BNC ports: one dedicated ASI/SDI output port and one software-selectable ASI/SDI input- or second independent output port, with status LED
- All hardware and software features found in the market place, plus more
- Watchdog-controlled input-to-output relay for redundant configurations
- Support for genlock
- Cable equalisation and inverted ASI
- Bitrate measurement and statistics
- Flexible receive modes with time-stamping, packet-sequence counting and false-sync pass through for full TR 101 290 support
- Lossless SDI Huffman encoding / decoding
- PCI Express x1, low profile
- Low profile and standard profile PCI brackets available

Applications

- ASI/SDI stream station
- High-availability ASI/SDI generation
- ASI/SDI analysis or monitoring
- Universal ASI/SDI input/output adapter for PC-based applications that record, play and/or process MPEG-2 transport streams and/or SDI digital video



Low profile or standard PCI bracket
ASI/SDI input+output or dual output
Most complete feature set in the market

Key Attributes

Parameter		Value
Connector		75-Ω BNC (2x*)
Return loss		> 15dB
Hardware buffering		16MB/channel
ASI	Physical layer	DVB-ASI (coax) EN50083-9
	Bitrate range	0 to 214Mbit/s
	Packet size	188 or 204**
SDI	Physical layer	SMPTE 259M/C
	Bitrate	270Mbit/s
	#Bits	8 or 10bit
PCI Express		PCIe1 x1 low profile
OS		Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

* 1xOutput port and 1xsoftware-selectable input or output port
** Arbitrary packet size in raw mode

DTA-2152

Dual HD-SDI / ASI Ports with Genlock

Features

- Dual-port HD-SDI adapter for PCI Express with analogue genlock input
- Each port can be independently configured as HD-SDI input or output
- Supports SD (SMPTE 259M) and HD (SMPTE 292M) signals
- Analogue genlock input accepts bi- and tri-level synchronization signals
- Hardware scaler for on-board 1/4 and 1/16 down sampling
- Comes with new DekTec Matrix API®, which provides convenient C++ classes for line-based access to audio, video HANC and VANC
- Full frame capture and play-out
- Access to all 16 audio channels
- PCI Express x4, low profile
- Low profile and standard profile PCI brackets available

Each HD-SDI port can be input or output
Analogue genlock input
Random access to audio, video, HANC/VANC

Applications

- General purpose HD-SDI processor
- Key and fill generators
- HD-SDI recording and play-out
- Video encoding or transcoding

Key Attributes

Parameter	Value
Physical layer	DVB-ASI: EN50083-9 SD-SDI: SMPTE 259M HD-SDI: SMPTE 292M
Connectors	3x 75-Ω BNC
Ports	1,2: SDI (in or out) 3: Genlock input
Return loss	≥15dB @ 0 to 1.5GHz
HD format	720p and 1080i
Memory	256MB
PCI Express	PCIe1 x4 low profile
OS	Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

Supported Formats

Formats
525i59.94, 625i50
720p23.98, 720p24, 720p25, 720p29.97, 720p30, 720p50, 720p59.94, 720p60
1080p(sf)23.98, 1080p(sf)24, 1080p(sf)25, 1080p(sf)29.97, 1080p(sf)30, 1080i50, 1080i59.94, 1080i60

Ordering Information

Type	Description
DTA-2152	2x HD-SDI / ASI for PCIe
DTA-2152-SY-SXP	DTA-2152 with *SdEye, StreamXpert® and StreamXpress®*

DTA-2160

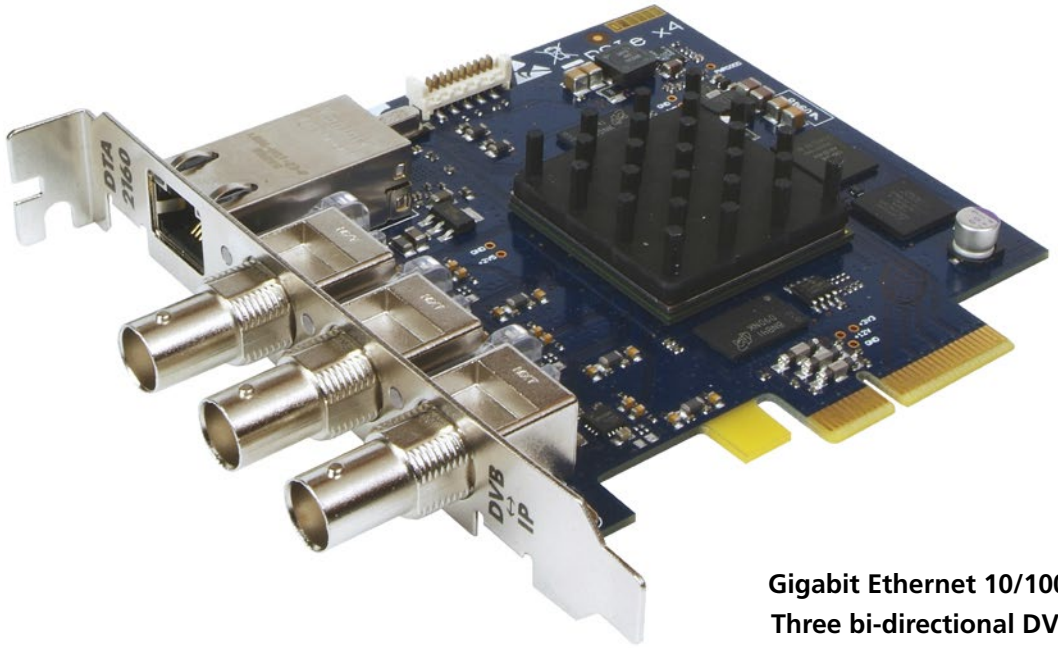
Triple ASI Ports and GigE Network Port

Features

- General-purpose transmission and reception of Transport Streams over ASI links and IP networks
- IP encapsulation in accordance with SMPTE 2022-1 and 2022-2
- Zero-jitter playout of multiple TS-over-IP streams
- Source-specific multicast (SSM) support
- Generation of two-dimensional FEC with programmable dimensions D and L and block-aligned FEC linearization
- Re-ordering and error correction of TS-over-IP streams with programmable latency
- Time stamping of incoming IP packets to enable TS-over-IP jitter analysis
- Comes with NDIS network driver for Windows and Linux network driver

Applications

- Contribution, primary distribution over IP
- Multipurpose ASI/TS-over-IP stream station
- Jitter measurements of TS-over-IP streams
- General-purpose ASI and TS-over-IP inputs and outputs for OEM applications



Gigabit Ethernet 10/100/1000 port
Three bi-directional DVB-ASI ports
Create your own IP/ASI stream station

Key Attributes

Parameter		Value
TS-over-IP	Physical layer	IEEE 802.3ab
	Data rate	10/100/1000
	Connector	RJ-45
	Maximum TS rate	600Mbit/s
	Parallel TS-over-IP streams	100+*
ASI	Physical layer	DVB-ASI (coax)
	Connector	75-Ω BNC (3x)
	Rx or Tx bitrate	0 to 214Mbit/s
	Resolution	<1bit/s
Transport packets per IP		1,2,3,4,5,6 or 7
TS-over-IP protocol		UDP or RTP
TS-over-IP FEC and Encapsulation		SMPTE 2022
Transcoding rate		0 to 200Mbit/s
PCI Express		PCIe1 x4
OS		Windows 7, 8, 10 Linux ≥2.6.32, 3.x, 4.x

* Limited only by cumulative TS rate and PC resources

DTA-2162

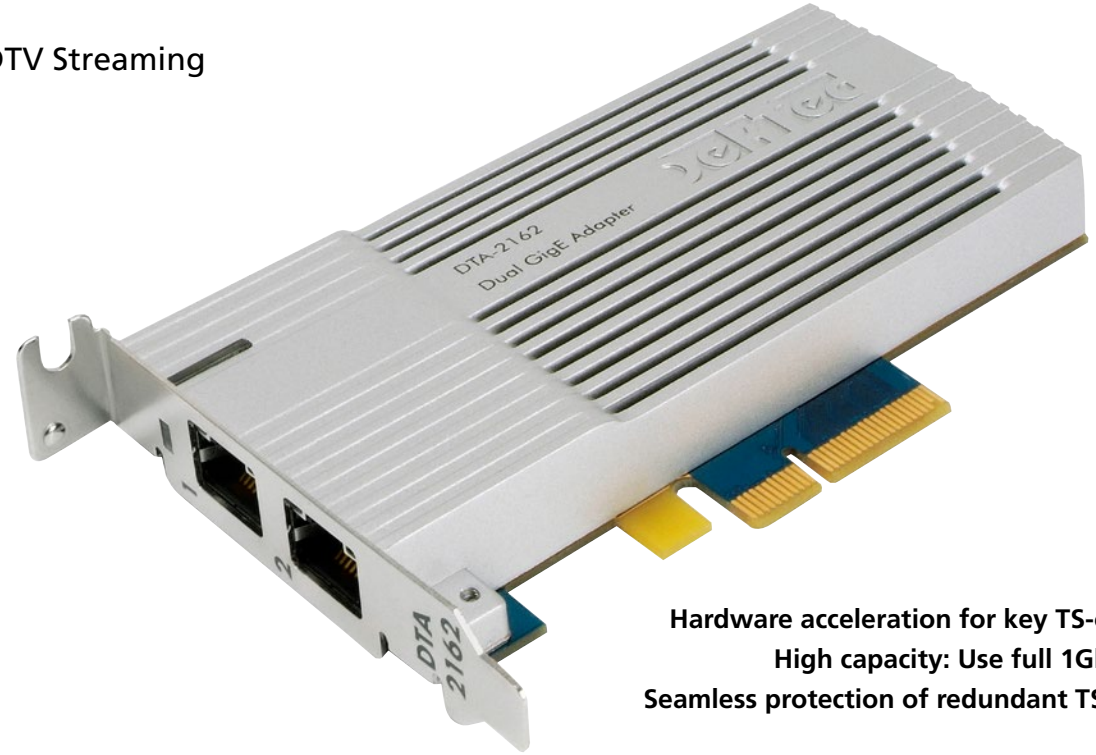
Dual GigE Ports with Hardware Accelerated DTV Streaming

Features

- Two 100/1000 IEEE 802.3ab network ports enhanced with hardware-accelerated DTV streaming functions
- Greatly simplifies generation and consumption of TS-over-IP streams in your custom application
- Facilitates working with redundant TS-over-IP streams for creating highly-available networks
- Encapsulation and decapsulation of TS-over-IP streams with FEC support
- Hardware-based IP address filtering
- On-board packet scheduling engine for zero-jitter playout
- IP packet timestamping for jitter analysis or smoothing
- Supports TCP/IP task offloading to save CPU cycles
- Free Windows and Linux SDK (DTAPI) is fully compatible with other DekTec digital-television adapters
- Standard Windows and Linux network driver so that DTA-2162 ports can be used as standard network interface
- PCI Express x4, low profile
- Low- and standard profile PCI brackets available

Applications

- Monitoring of fully loaded Gigabit Ethernet links
- TS-over-IP processing of hundreds of streams
- Highly-available IP-based encoding, transcoding and multiplexing systems
- TS-over-IP stream station



Hardware acceleration for key TS-over-IP functions
High capacity: Use full 1Gbps on each port
Seamless protection of redundant TS-over-IP streams (SMPTE 2022-7)

Key Attributes

Parameter	Value
Physical layer	IEEE 802.3ab
Ports	2x 100/1000 auto
Connector	RJ-45 with LEDs
IP protocol version	IPv4, IPv6
Seamless IP protection	SMPTE 2022-7
VLAN	IEEE 802.1Q
Maximum aggregated rate	1Gbps per port
Parallel TS-over-IP streams	200+*
TS-over-IP protocol	UDP or RTP
IP FEC	SMPTE 2022-1
IP encapsulation	SMPTE 2022-2
PCI Express	PCIe1 x4 low profile
OS	Windows 7, 8, 10 Linux ≥2.6.32, 3.x, 4.x

* Limited only by cumulative TS rate and PC resources

DTA-2174

Quad 3G-SDI/ASI Ports with Genlock

Features

- Each port is fully software configurable:
  - Input or output
  - ASI or SD/HD/3G-SDI
- Generates or captures uncompressed Ultra-HD 4Kp50 and 4Kp60 streams following the SMPTE-425-5 quad-3G link standard
- Bi- and tri-level genlock input port
- Two RS-422 ports for controlling a deck
- Hardware provides efficient access to SDI frames:
  - Separation of audio and ancillary data
  - Conversion from and to 16-bit aligned values
  - Video scaler for generating previews
  - Sophisticated DMA engine
- DekTec Matrix API® 2.0 takes care of all the plumbing for creating robust real-time SDI processing applications
- PCI Express gen3 x4, low profile

Applications

- General purpose processing with any combination of 3G/HD/SD-SDI or ASI inputs or outputs
- Generation, reception and processing of uncompressed UHD signals
- Video mixing and effect generators
- SDI monitoring, recording and/or playout
- Video encoding, transcoding or decoding

Real-time uncompressed 4Kp50/60 streaming
Efficient access to audio, video and ancillary data
Mixed ASI and SDI applications

Key Attributes

Parameter	Value
Physical layer	DVB-ASI : EN50083-9 SD-SDI : SMPTE 259M HD-SDI : SMPTE 292M 3G-SDI : SMPTE 424M level A/B 4K: SMPTE 425-5 quad link
Connectors	5x 75-Ω 1.0/2.3 DIN plugs 2x 10p RS-422 header
Return loss	≥12dB @ 0 to 3GHz
DekTec Matrix API®	8/10/16-bit conversion Audio/video/ANC extraction Hardware scaling by 1/4 or 1/16 Access to all 16 audio channels
PCI Express	PCIe3 x4 low profile
OS	Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

Supported Formats

Supported Formats
525i59.94, 625i50
720p23.98, 720p24, 720p25, 720p29.97, 720p30, 720p50, 720p59.94, 720p60
1080p(sf)23.98, 1080p(sf)24, 1080p(sf)25, 1080p(sf)29.97, 1080p(sf)30, 1080i50, 1080i59.94, 1080i60

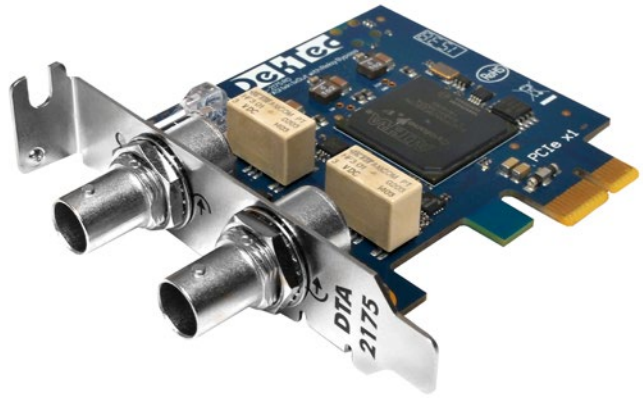
DTA-2175

3G-SDI/ASI Input + Output with Bypass Relay



Features

- One dedicated SDI/ASI input and one dedicated SDI/ASI output, both supporting up to 3G-SDI
- Watchdog-controlled input-to-output bypass relay for failsafe configurations
- DekTec Matrix API® 2.0 takes care of all the plumbing for creating robust real-time SDI processing applications
- Cable equalization and inverted ASI
- Bitrate measurement and statistics
- Flexible receive modes with time-stamping, packet-sequence counting and false-sync pass through for full TR 101 290 support
- PCI Express gen2 x1, low profile

Applications

- "Inline" processing of SDI or ASI signals
- ASI-to-SDI software decoder
- SDI-to-ASI software encoder
- High-availability SDI/ASI generation
- SDI/ASI analysis or monitoring

Both ports support 3G-, HD-, SD-SDI and ASI
Bypass relay for failsafe applications
Efficient access to audio, video and ancillary data

Key Attributes

Parameter	Value
Ports	1 SDI/ASI in, 1 SDI/ASI out
Physical layer	DVB-ASI : EN50083-9 SD-SDI : SMPTE 259M HD-SDI : SMPTE 292M 3G-SDI : SMPTE 424M level A/B
Connectors	2x 75-Ω BNC
Return loss	> 15dB
DekTec Matrix API® 2.0	8/10/16-bit conversion Audio/video/ANC extraction Hardware scaling by 1/4 or 1/16 Access to all 16 audio channels
PCI Express	PCIe2 x1 low profile
OS	Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

DTA-2179

Twelve HD-SDI/ASI Ports with Genlock for PCIe

Features

- Twelve flexible ports, each independently configurable from software:
  - Input or output
  - HD-SDI, SD-SDI or ASI
  - Up to eight ports 3G-SDI
- Combine HD-SDI and ASI ports in any mix
- Graphics-card class PCI Express gen3 x16 interface avoids bus-bandwidth limitations
- Bi-level and tri-level genlock input port, or digital genlock through port 1
- DekTec Matrix API® 2.0 takes care of all the plumbing for creating robust real-time SDI processing applications.
- Free drivers and SDK (DTAPI) for 32 and 64-bit Windows and Linux

Applications

- Processing UHD signals up to 4Kp50/60
- Monitoring/creating many SDI or ASI signals
- Live production mixer and effect generators
- Image processing with many cameras

High-density HD-SDI/ASI connectivity
High bandwidth: PCIe gen3 x16 interface
Optimized for DekTec Matrix API®

Key Attributes

Parameter	Value
Ports	12 SDI*/ASI ports, 1 genlock port
Physical layer	DVB-ASI : EN50083-9 SD-SDI : SMPTE 259M HD-SDI : SMPTE 292M 3G-SDI : SMPTE 424M 4K : SMPTE 425-5 quad link
Connectors	13x 75-Ω DIN 1.0/2.3
Return loss	≥12dB @ 0 to 3GHz
DekTec Matrix API®	8/10/16-bit conversion Audio/video/ANC extraction Hardware scaling by 1/4 or 1/16 Multiple stream synchronisation
PCI Express	PCIe3 x16
OS	Windows 7, 8, 10 Linux ≥ 2.6.32, 3.x, 4.x

* Maximally 8x 3G-SDI simultaneously

DTA-2180

H.264 HD Encoder

PCI EXPRESS

Audio: AC3 or AAC up to 2x 5.1, MPEG-1 Layer II
Built-in multiplexing with precise A/V sync
Encoder uses proven Magnum technology

Features

- Real-time, low latency MPEG-2 or H.264, SD or HD, video and audio encoder
- Audio encoding options: Dolby Digital Pro (AC3), MPEG-1 Layer II, AAC, HE-AAC
- HD-SDI and HDMI input (one active)
- ASI output and data available on PCIe bus
- Use the HDMI input to encode the output of a PC's graphics card with high quality
- Supported on Windows and Linux by the free DekTec SDK (DTAPI), for easy mix and match with other DekTec I/O adapters
- Integrated in MuxXpert for combining multiple encoded services and adding tables
- Comes with control application to set encoding parameters and check input and encoder status

Applications

- General purpose H.264 program encoder for contribution, production and distribution
- Encoding of PC desktop, running e.g. a PowerPoint or Prezi presentation
- H.264 encoding of Xpect Mosaic output

Key Attributes

Parameter	Value
SDI input	SD, HD
HDMI input	HDMI 1.4a
Power connector	6-pin PCIe power
H.264 profiles	Main, high
MPEG-2 profiles	MP@ML/HL, HP@HL
Sample format	8-bit 4:2:0
#Audio channels	Up to 8x stereo or 2x 5.1
Ancillary data	Closed captions, XDS, AFD/BAR, VITC
Encoding latency	150/200/350/650ms
PCI Express	PCIe1 x1 +EXT25W low profile
OS	Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

Ordering Information

Type	Description
DTA-2180	Low-latency H.264 / MPEG-2 video encoder for SD and HD, without audio-encoding licenses
DTA-2180-AG0	H.264 HD contribution encoder for PCIe with AAC and/or MP1LII audio encoding for any number of channels (no AC3 audio-encoding licenses)
DTA-2180-AG2	H.264 HD contribution encoder for PCIe with 2 license points (1x stereo) for AC3 audio encoding, and AAC and/or MP1LII audio encoding for any number of channels

Please refer to www.dektec.com for more options and an on-line price calculator.

DTA-2182

Dual H.264 HD Encoder for PCI Express

Features

- Dual-channel version of the DTA-2180
- Supports H.264 and MPEG-2 encoding in HD or SD resolution
- Two HD/3G-SDI inputs and two low-delay ASI outputs
- Multiplexing to transport stream, available on ASI outputs and on PCIe bus
- Audio encoding options: Dolby Digital Pro (AC3), MPEG-1 Layer II, AAC, HE-AAC
- Closed captioning pass through
- Supported on Windows and Linux by the free DekTec SDK (DTAPI), for easy mix and match with other DekTec I/O adapters
- Standard applications available for controlling encoding parameters and for recording an encoded services
- Comes with control application to set encoding parameters and check input and encoder status

Applications

- Multi-channel H.264 HD encoder, e.g. for tunnelling multiple TV services over IP
- H.264 encoder for PC applications that generate TV channels and require the output to be encoded in H.264 or MPEG-2

Two encoders on a low profile PCIe card
Audio: AC3 or AAC up to 2x 5.1, MPEG-1 Layer II
Built-in multiplexing with precise A/V sync

Key Attributes

Parameter	Value
Ports	2x 75-Ω 1.0/2.3 SDI input 2x 75-Ω 1.0/2.3 ASI output
Power connector	6-pin PCIe power
SDI input formats	SD, HD
H.264 profiles	Main, high
MPEG-2 profiles	MP@ML/HL, HP@HL
Sample format	8-bit 4:2:0
#Audio channels	Up to 8x stereo or 2x 5.1
Ancillary data	Closed captions, XDS, AFD/BAR, VITC
Encoding latency	150/200/350/650ms
PCI Express	PCIe2 x4 +EXT25W, low profile
OS	Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

Ordering Information

Type	Description
DTA-2182	Dual H.264/MPEG-2 encoder for SD and HD, without audio-encoding licenses
DTA-2182-AG2	Dual H.264 HD encoder for PCIe with 2 license points (1x stereo) for AC3 audio encoding, and AAC and/or MP1LII audio encoding for any number of channels

Please refer to www.dektec.com for more options and an on-line price calculator.

Options

Option	Description
-AAC*n*	*n*-channel AAC-LC audio encoding
-DD*n*	*n*-channel AC3 audio encoding
-HE*n*	*n*-channel HE-AAC audio encoding
-MP*n*	*n*-channel MPEG1-LII audio encoding

A stereo service requires 2 channels, 5.1 requires 6 channels

NEW PRODUCT *Please contact DekTec for availability*

DTA-2184

UHD or Quad-HD HEVC Encoder

Features

- Real-time HEVC/H.265 video encoding for UHD and HD formats, with integrated multi-channel Dolby Digital Pro (AC3), AAC and MPEG-1 layer II audio encoding
- 8-bit 4:2:0 or 10-bit 4:2:2
- Encodes up to 4Kp60 from either 4x 3G-SDI or 12G SDI input
- Video input can also be sourced through PCIe bus
- Simultaneous encoding of up to 4x 1080p60
- Encoded output available on ASI port and PCIe bus
- Supported on Windows and Linux by the free DekTec SDK (DTAPI)
- Comes with control application to set encoding parameters and check input and encoder status

Applications

- Broadcast quality 4K program encoder for contribution, production and distribution
- Multi-program encoder for high density hardware implementation

Broadcast-quality HEVC encoder up to 4Kp50/60 resolution
High density: Multiple encoder cards can be fitted in a PC
Built-in multiplexing with precise audio/video synchronization

Key Attributes

Parameter	Value
Video encoding	HEVC 1x up to 2160p60 or 4x up to 1080p60
HEVC profiles	Main, Main 10
Sample format	8-bit 4:2:0 or 10-bit 4:2:2
Audio encoding	AC3, AAC-LC, HE-AAC, MP1LII Up to 4x stereo or 5.1 + stereo
Ancillary data	Closed captions
Ports	1x HD/3G/12G-SDI in 3x HD/3G-SDI in 1x DVB-ASI out Access to all 16 audio channels
Connectors	5x micro-BNC
Power connector	6-pin PCIe power
PCI Express	PCIe3 x4 +EXT25W, low profile
OS	Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x

Ordering Information

Type	Description
DTA-2184	UHD/4xHD HEVC encoder without audio-encoding licenses
DTA-2184-AG0	UHD/4xHD HEVC encoder with AAC and/or MP1LII audio encoding for any number of channels (no AC3 licenses)
DTA-2184-AG2	UHD/4xHD HEVC encoder with 2 license points (1x stereo) for AC3 audio encoding, and AAC and/or MP1LII audio encoding for any number of channels

Please refer to dektec.com for more options and an on-line price calculator.

DTA-2195

12G-SDI I/O Adapter with HDMI 2.0 Monitor Output

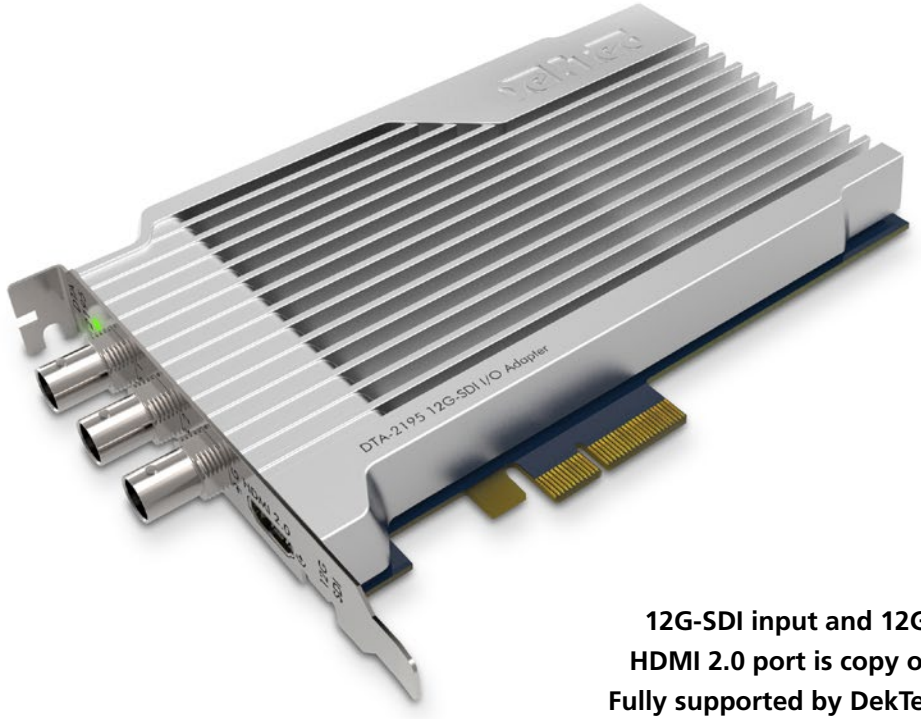
Features

- 12G-SDI input port for ingesting UHD signals up to 4Kp50/60
- 12G-SDI output port with HDMI 2.0 copy for creating UHD signals up to 4Kp50/60
- Bi-level and tri-level genlock input port, or digital genlock through port 1
- PCI Express gen3 four-lane interface for ample bus bandwidth
- Hardware and DekTec Matrix API® 2.0 provide efficient and convenient access to SDI frames:
  - Separation of audio (all channels) and ancillary data
  - On-board 1/4 or 1/16 video scaling for generating previews
  - Sophisticated DMA engine
  - Conversion from and to 16-bit data
- Free drivers and SDK (DTAPI) for Linux and Windows 7/8/10

Applications

- General purpose I/O card for processing 12G-SDI streams in a PC
- ASI/SDI stream station (generator, analyzer) for all SDI rates up 12G-SDI
- 4K software encoder (H.264, HEVC) with 12G-SDI input and ASI output

NEW PRODUCT *Please contact DekTec for availability*



12G-SDI input and 12G-SDI output port
HDMI 2.0 port is copy of 12G-SDI output
Fully supported by DekTec Matrix API® 2.0

Key Attributes

Parameter	Value
Ports	1x 12G-SDI input 1x 12G-SDI output 1x HDMI 2.0 output 1x genlock port
Physical layer	DVB-ASI : EN50083-9 SD-SDI : SMPTE 259M HD-SDI : SMPTE 292M 3G-SDI : SMPTE 424M 6G-SDI : SMPTE 2081 12G-SDI : SMPTE 2082
Connectors	3x 75-Ω BNC HDMI type A receptacle
Return loss	≥12dB @ 0 to 3GHz
PCI Express	PCIe3 x4
OS	Windows 7, 8, 10; Linux 2.6, 3.x, 4.x

PCI Cards

DTA-107S2
Satellite modulator

Satellite modulator with on-board L-band upconverter. The output can be directly connected to the antenna input of a satellite receiver.

DekTec's first modulator card and an instant bestseller. More than 12 years on the market and still selling a few copies every month.

Key Attributes DTA-107S2

Parameter	Value
Ports	2x 75Ω F-type RF out
Standards	DVB-S, DVB-S2, ISDB-S*
Symbol rate	1 to 45MBd
Carrier frequency	950 to 2150MHz

DTA-111
Cable/terrestrial modulator

Low-cost VHF/UHF modulator and upconverter for all popular QAM- and OFDM-based modulation schemes.

Derived from the DTA-115, this PCI card offers extreme versatility for its price and has proven ideal as OEM card for cost-sensitive applications.

Key Attributes DTA-111

Parameter	Value
Ports	1x 75Ω F-type RF out
Standards	ATSC, CMMB*, DAB+*, DTMB*, DVB-C, DVB-C2*, DVB-T, DVB-T2*, ISDB-T*, QAM
Frequency	47 to 862MHz
Bandwidth	5.0 to 8.0MHz

DTA-115
Multi-standard modulator

High-quality VHF/UHF modulator and upconverter with programmable output level for virtually all QAM- and OFDM-based modulation standards.

With over 10.000 copies sold, DekTec's most successful product ever. A large proportion of all TVs on earth has been tested with the DTA-115!

Key Attributes DTA-115

Parameter	Value
Ports	1x 50Ω BNC RF out 1x 75Ω F-type monitor out 1x 75Ω BNC ASI in
Standards	ATSC, CMMB*, DAB+*, DTMB*, DVB-C, DVB-C2*, DVB-T, DVB-T2*, ISDB-T*, QAM
Symbol rate	1 to 45MBd
Carrier frequency	950 to 2150MHz

* Modulation option

Back to content

The PCI bus has been largely overtaken by PCI Express. However, DekTec's highly popular range of PCI cards is still commercially available.

DTA-105
Dual DVB-ASI outputs

Cost-effective transport-stream PCI card with two independent DVB-ASI outputs, or a single doubly-buffered output.

Key Attributes DTA-105

Parameter	Value
Ports	2x 75Ω BNC ASI out
Bitrate	0 to 214Mbit/s

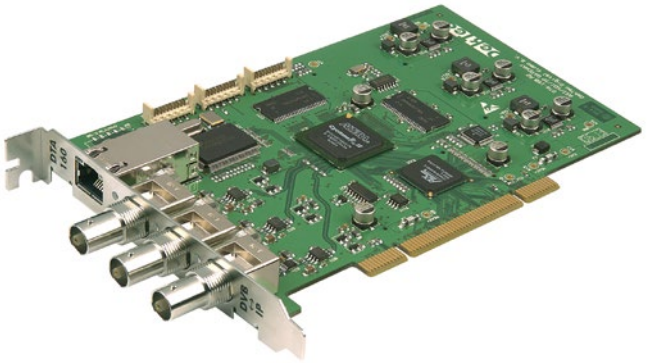
DTA-145
ASI input+output with bypass relays

Dual-port ASI adapter, with watchdog-controlled bypass relay. If the software or hardware fails, the relay physically connects ASI input to output.

A very popular card to create failsafe systems, where the ASI output of one server is connected to ASI input of a redundant server.

Key Attributes DTA-145

Parameter	Value
Ports	1x 75Ω BNC ASI/SD-SDI in/out 1x 75Ω BNC ASI/SD-SDI out
ASI bitrate	0 to 214Mbit/s
SDI bitrate	270Mbit/s



DTA-160
GigE and 3x ASI input/output

Gigabit Ethernet network card with three ASI ports, allowing TS-over-IP input/output with
zero-jitter transmission and jitter monitoring.

A complex product to develop, but a successful product for 10 years now, giving DekTec a head start in the new everything-will-be-IP world.

Key Attributes DTA-160

Parameter	Value
Ports	1x RJ-45 GigE (10/100/1000) 3x 75Ω BNC ASI in/out
TS-over-IP bitrate	0 to 600Mbit/s
ASI bitrate	0 to 214Mbit/s

DTU-215

USB-2 VHF/UHF Modulator

Features

- USB-2 based multi-standard modulator with support for most QAM-, OFDM- and VSB-based modulation standards
- Powered from the USB-2 bus, so no external power adapter is required
- Supports all constellations and modulation modes for each supported standard
- Digital upconversion for excellent signal quality without need for calibration
- Playout of I/Q sample files
- Programmable attenuator
- Free Windows and Linux SDK is fully compatible with other DekTec digital-video output adapters

Applications

- Multi-standard test generator
- Demonstrations
- Research and development

No power adapter required
Fully agile from 36 to 1002MHz
Channel simulation option

Key Attributes

Parameter		Value
RF connector		75-Ω F male
Frequency range		36 to 1002MHz ±3ppm
Bandwidth (max)		8.0MHz
I/Q sample rate		4.7 to 9.375MHz
Level	Range	-46 to -15dBm (QAM) -49 to -18dBm (OFDM)
	Step size	0.5dB
	Accuracy	±2dB
MER		>40dB
Adjacent channel		-54dB (QAM) -52dB (OFDM)
Phase noise		<-95dBc @ 10kHz
Spectral purity		>50dB (47 to 1000MHz)
USB port		USB-2
Power (through USB-2)		5V, 500mA
Dimensions (LxWxH)		123 x 62 x 22mm

Modulation Standards

Modulation	Standard
ATSC VSB	ATSC A/53E
CMMB*	GY/T 220.1/2-2006
DAB+*	EN 300 401
DTMB*	GB 20600-2006
DVB-C	EN 300 429
DVB-C2*	EN 302 769
DVB-T / DVB-H	EN 300 744
DVB-T2*	EN 302 755
I/Q*	Arbitrary I/Q samples
ISDB-T*	ARIB STD-B31
QAM	J.83 Annex A/B/C

* Option

DTU-236A

8-VSB/QAM RF Probe with ASI Input for USB-2

Features

- Light-weight, easy-to-use RF adapter for tuning to any UHF/VHF or cable channel in the 45 to 1002MHz range
- Support for all QAM variants
- Extra input for Transport Streams on ASI
- Capture TS signals directly to file on a laptop PC for easy field recording
- Ruggedized portable unit that requires no additional power supply or batteries, operates entirely from a USB-2 connection
- Sensitive front-end allowing reception of RF signals from -30 to +50dBmV
- Combine DTU-236A with RFXpert software for RF measurements, *StreamXpert®* for real-time Transport-Stream analysis
- Channel plans for world-wide regions

RFXpert Measurements

- RF Level, MER, EVM, Constellation, Eye
- BER: Pre/Post FEC, SER (Severe Errored), Errored Seconds
- Channel, Adjacent and Full Spectrum

Receives any UHF/VHF or cable channel
Additional ASI Transport-Stream input
No power supply or batteries required

Key Attributes

Parameter		Value
RF	Connector	75-Ω "F" female
	Frequency range	45 to 1002MHz
	Bandwidth	6/7/8MHz
	Level measurement	-30 to +50dBmV
	Level accuracy	±2dB
	MER range	15 to 38dB
ASI	Connector	75-Ω BNC
	Standard	EN50083-9
	Bit rate	0.5 to 100Mbit/s
Dimensions in mm (LxWxH)		180x107x36
Weight		< 500g

DTU-238

DVB-T2/T/C, ISDB-T and ASI Probe for USB-2

DVB-T2, DVB-T and DVB-C reception
Additional ASI Transport-Stream input
No power supply or batteries required

Features

- Light-weight, RF adapter for tuning to any UHF/VHF or cable channel in the 42 to 1002MHz range
- Receiver for DVB-T2, DVB-T, DVB-C2 and ISDB-T
- Extra input for Transport Streams on ASI
- Capture TS signals directly to file on a laptop PC for easy field recording
- Ruggedized portable unit that requires no additional power supply or batteries, operates entirely from a USB-2 connection
- Sensitive front-end allowing reception of RF signals from -40 to +50dBmV
- Combine DTU-238 with RFXpert software for RF measurements, *StreamXpert®* for real-time Transport-Stream analysis
- Channel plans for world-wide regions

RFXpert Measurements

- RF Level, MER, EVM, Constellation, Eye
- BER: Pre/Post FEC, PER (Packet Error Rate), Errored seconds
- Channel, Adjacent and Full Spectrum

Key Attributes

Parameter		Value
RF	Connector	75-Ω "F" female
	Frequency range	42 to 1002MHz
	Bandwidth	1.7/5/6/7/8/10MHz
	Input sensitivity	-30 to +50dBmV
	Input return loss	8dB
	MER range	15 to 38dB
ASI	Connector	75-Ω BNC
	Standard	EN50083-9
	Bit rate	0.5 to 100Mbit/s
Dimensions in mm (LxWxH)		180x107x36

DTU-245

FantASI USB-2 ASI/SDI Input+Output Adapter

Features

- Convenient, compact USB adapter that can be used to capture and generate MPEG-2 transport streams (ASI) and uncompressed serial digital video (SDI)
- USB powered - no power supply required
- Independent operation of input and output:
  - Full-duplex: maximum combined bitrate of 160Mbit/s
  - Half-duplex: Full DVB-ASI and SDI bitrate range
- 16-Mbytes local hardware buffer for sustained real-time streaming

Applications

- General-purpose USB adapter for capturing, generating and processing of ASI and SDI streams
- On-site recording and analysis
- Portable demo set

Bundled Software (DTU-245-SXP)

- *StreamXpert*® transport-stream analyzer
- *StreamXpress*® ASI / SDI player
- Windows/Linux drivers and associated SDK for developing custom applications

No AC power adapter required
Portable streaming of DVB-ASI and SDI
Essential tool for every digital-TV engineer

Key Attributes

Parameter		Value
Connector		75-Ω BNC (2x)
ASI	Physical layer	EN50083-9
	Bitrate range	0 to 214Mbit/s*
	Packet size	188 or 204
SDI	Physical layer	SMPTE 259M/C
	Bitrate (half-duplex only)	270Mbit/s
	#Bits	8 or 10 bit
USB port		USB-2**
Power (through USB-2)		5V, 400mA max
Dimensions in mm (LxWxH)		87 x 104 x 30

* 0 to 160 Mbit/s (full-duplex), 0 to 214Mbit/s (half-duplex)
** USB-1 provides insufficient bandwidth and is not supported

DTU-315

All-Standard All-Band Modulator for USB-3

Modulator for all popular DTV standards
Fully agile over VHF, UHF and L-band
USB cable supplies power, data and control

Features

- Pocket-size modulator for satellite, cable and terrestrial standards
- Fully agile from 36 to 2150MHz, covering VHF, UHF and L-band
- Modulation bandwidth up to 70MHz
- Excellent signal quality
- Single USB cable to the DTU-315 supplies power, data and control
- Supports all constellations and modulation modes for each supported standard
- Digital channel simulator option including multipath echo and AWGN
- F and BNC cable assemblies included
- Use with DekTec's *StreamXpress*® for easy generation of RF test signals
- Free Windows and Linux SDK (DTAPI) for writing your own applications

Applications

- RF test generator in your R&D lab or factory for developing, qualifying or repairing any equipment with a DTV antenna input
- Portable demo set for TV receivers, easy to carry to customer demos, trade shows, etc.
- TV transmission or distribution using modulated signals in shops, hotels, hospitals etc.

Key Attributes

Parameter		Value
RF connector		75-Ω micro-BNC female
Frequency range		36 to 2150MHz
Bandwidth (max)		70MHz
I/Q sample rate		0.08 to 70Msps
RF level	Range*	-45 to -25dBm
	Step size	0.5dB
MER (typical)		>40dB
Phase noise		<-105dBc @ 10kHz
Spectral purity		>50dB
USB port		USB-3**
OS		Windows 7, 8, 10

* For OFDM standards: up to 1GHz; for single-carrier standards up to 2GHz; above 2GHz the output level is max. 5dB lower.
** Must be a real USB-3 port; the DTU-315 will not operate with USB-2.

Modulation Standards

Standards
ADTB-T*, ATSC, ATSC-M/H*, ATSC 3.0*, CMMB*, DAB(+)*, DMB-T/H*, DVB-C, DVB-C2*, DVB-CID, DVB-S, DVB-S2, DVB-S2X*, DVB-T, DVB-T2 single PLP, DVB-T2 (full)*, I/Q samples*, ISDB-S*, ISDB-T*, ISDB-Tmm*, QAM-B, QAM-C, T-DMB*

* Option

DTU-351

HD-SDI Input for USB-3

Features

- General purpose HD-SDI input for USB-3
- All 10-bit samples from the full SDI frame can be read
- Supported by DekTec Matrix API® 2.0 to automatically separate HANC, VANC and video
- All 16 audio channels can be read
- Scaling by 1/4 or 1/16 in hardware; scaling factor can be switched on-the-fly
- DirectShow filter available
- Free SDK for easy programmatic access to video, audio channels and auxiliary data

Applications

- With *SdEye*: HD-SDI waveform analysis
- Input for DirectShow-enabled applications that process uncompressed video
- HD-SDI input for your application

HD-SDI Interface with full frame access
Hardware scaling to reduce USB bandwidth
Support for HD- and SD-SDI

Key Attributes

Parameter	Value
Physical layer	SD-SDI: SMPTE 259M HD-SDI: SMPTE 292M
Connector	75-Ω BNC
Return loss	≥12dB @ 0 to 1.5GHz
DekTec Matrix API® features	8/10/16-bit conversion Audio/video/ANC extraction Hardware scaling by 1/4 or 1/16 Multiple unit synchronization
USB port	USB-3*
SDK	DTAPI, DekTec Matrix API® 2.0 DirectShow filter
OS	Windows 7, 8, 10 Linux 3.x, 4.x

* Must be a real USB-3 port; the DTU-351 will not operate with USB-2

Supported Formats

Formats
525i59.94, 625i50
720p23.98, 720p24, 720p25, 720p29.97, 720p30, 720p50, 720p59.94, 720p60
1080p(sf)23.98, 1080p(sf)24, 1080p(sf)25, 1080p(sf)29.97, 1080p(sf)30, 1080i50, 1080i59.94, 1080i60

DTE-3100

Networked DVB-ASI Output Adapter

TS-over-IP to DVB-ASI converter
Power over Ethernet enabled
UDP, RTP, 2D FEC (SMPTE-2022)

Features

- Standalone module can either be used as compact autonomous TS-over-IP to ASI gateway, or as remote I/O device for PC-based applications
- SMPTE-2022 and DTAPI mode
- Power over Ethernet (PoE) support: No separate power feed required
- External power supply available for use with non-PoE enabled switch
- Advanced time-reconstruction algorithm to overcome IP jitter, with programmable size of jitter-tolerance buffer
- Supports IP decapsulation and 2D FEC decoding according to SMPTE 2022-1 and SMPTE 2022-2
- LCD status display shows device identifier, bitrate, IP/MAC address and status
- Uniform software access to DekTec TS-over-IP-, PCI- and USB devices through DTAPI
- Install up to 12 modules in 3U 19" rack space using the DekTec rack-mountable rail
- Units can be mounted directly on a wall using a DIN rail

Applications

- Autonomous TS-over-IP to DVB-ASI gateway
- With DTE-3120: Tunnelling of ASI signals over LAN, WAN or the Internet
- Remote DVB-ASI output adapter for server-based data inserters, stream servers, multiplexers and similar systems

Key Attributes

Parameter		Value
GigE port	Physical layer	IEEE 802.3af
	Data rate	10/100/1000
	Connector	RJ-45
ASI port	Physical layer	DVB-ASI (coax)
	Connector	75-Ω BNC (2x)
	Tx bitrate	0 to 214Mbit/s*
	Resolution	<1bit/s
Transport	TP per IP	1 to 7
	Encapsulation	UDP or RTP
	FEC	SMPTE 2022
TS-over-IP to ASI latency		10ms
Jitter tolerance range		1 to 120 ms
DVB ID		5824

* 209Mbit/s in SMPTE mode

Control

IP-address assignment	DHCP or static
Multicast support	IGMP v2
Device management	Browser based
Network management	SNMP v2c
Discovery	WS-Discovery

DTE-3114

Networked Quad QAM Modulator

Four QAM-A/B/C modulators
Agile over VHF/UHF up to 1GHz
RTP with FEC decoding on each channel

Features

- Standalone four-channel QAM modulator with TS-over-IP inputs and directly synthesized VHF/UHF outputs
- 2D FEC decoder for error correction of incoming TS-over-IP streams
- Web and SNMP interface for setting parameters and observing status
- Unit can be powered via the Ethernet cable (Power over Ethernet) or through a DC power supply jack
- Advanced removal of IP jitter with programmable size of jitter-tolerance buffer
- Full support of SMPTE 2022-1/2
- LCD status display shows device identifier, QAM-mode, carrier frequencies, output level and IP/MAC address
- Install up to 12 modules in 3U 19" rack space using DekTec rack-mountable rail

Applications

- Cable-TV modulator with TS-over-IP input
- QAM test generator

Key Attributes

Parameter		Value
Main RF port	Connector	75-Ω F Female
	Output level (total)	-32 to -9dBm
Monitor port	Connector	75-Ω F Female
	Output level (total)	-33±3dBm
RF	Range	36 to 1002MHz
	Channel spacing	6 to 8MHz
	Symbol rate	4.48 to 7.0MBd
	MER	42dB
GigE port	Physical layer	IEEE 802.3af
	Connector	RJ-45
Transport	TP per IP	1 to 7
	Encapsulation/FEC	SMPTE 2022
TS-over-IP to QAM latency		10ms (max)
Jitter tolerance range		1 to 120 ms

Modulation

QAM-A	EN 300 429 (DVB-C)
QAM-B	J.83 Annex B with support for all interleaver modes
QAM-C	J.83 Annex C

Control

IP-address assignment	DHCP or static
Multicast support	IGMP v2
Device management	Browser based
Network management	SNMP v2c
Discovery	WS-Discovery

DTE-3120

Networked DVB-ASI Input Adapter

Features

- Standalone module can either be used as compact autonomous ASI to TS-over-IP gateway, or as remote I/O device for PC-based applications
- SMPTE-2022 and DTAPI mode
- Time stamping for monitoring applications
- Power over Ethernet (PoE) support: No separate power feed required
- External power supply available for use with a non-PoE enabled switch
- Fail-over relays for input-to-output connection in case of power failure
- Supports IP encapsulation and 2D FEC encoding according to SMPTE 2022-1 and SMPTE 2022-2
- LCD status display shows device identifier, bitrate, IP/MAC address and status
- Uniform software access to DekTec TS-over-IP-, PCI- and USB devices through DTAPI
- Install up to 12 modules in 3U 19" rack space using the DekTec rack-mountable rail
- Units can be mounted directly on a wall using a DIN rail

Applications

- Autonomous DVB-ASI to TS-over-IP gateway
- With DTE-3100: Tunnelling of ASI signals over LAN, WAN or the Internet
- Remote DVB-ASI input adapter for server-based analysers, monitoring applications (*Xpect*)®, multiplexers and similar systems

DVB-ASI to TS-over-IP converter
Power over Ethernet enabled
UDP, RTP, 2D FEC (SMPTE-2022)

Key Attributes

Parameter		Value
GigE port	Physical layer	IEEE 802.3af
	Data rate	10/100/1000
	Connector	RJ-45
ASI port	Physical layer	DVB-ASI (coax)
	Connector	75-Ω BNC (2x)
	Rx bitrate	0 to 214Mbit/s
	Return loss	17dB typ.
Transport	TP per IP	1 to 7
	Encapsulation	UDP or RTP
	FEC	SMPTE 2022
ASI to TS-over-IP latency		10ms
Buffer size		32MB

DTE-3137

Networked DVB-S(2) Satellite Receiver

Compact professional satellite receiver
Full TS output on IP and DVB-ASI
LNB power insertion

Features

- Standalone DVB-S2 receiver supporting QPSK, 8PSK, 16APSK and 32APSK
- DVB-S2 demodulation compliant to EN302-307 and EN301-210, as well as legacy DVB-S support
- Web and SNMP interface for setting parameters and observing status
- Unit can be powered via the Ethernet cable (Power over Ethernet) or through a DC power supply jack
- LNB power insertion
- Full support of SMPTE 2022-1/2, with 2D FEC encoder for robust transport over IP
- LCD status display shows device identifier, mode, carrier frequency, level, SNR, BER and IP/MAC address
- Install up to 12 modules in 3U 19" rack space using DekTec rack-mountable rail

Applications

- SMATV: Redistribution of satellite TV
- General-purpose receiver for obtaining the full Transport Stream from a DVB-S2 signal

Key Attributes

Parameter		Value
RF input	Connector	75-Ω F Female
	Return loss	>10dB
	Tuning range	950 to 2150MHz
	Sensitivity	-30 to -60dBm
	Baud rate	2 to 40MBd
LNB	Supply	13V/18V 400mA
	22kHz tone	On/Off
TS output ASI port	Connector	75-Ω BNC
	DVB-ASI	EN50083-9
GigE port	Connector	RJ-45
	Physical layer	IEEE 802.3at
Transport	TP per IP	1 to 7; UDP/RTP
	FEC	SMPTE 2022-1
Device power	Connector	2.1 mm DC plug
	24V Supply	22 to 30V; 17W

Standards

Standard	Mode
EN 301 210	DVB-S
EN 302 307	DVB-S2: QPSK, 8-/16-/32APSK CCM only

DTE-RCK1
19” Mountable Rack for DTE-31XX

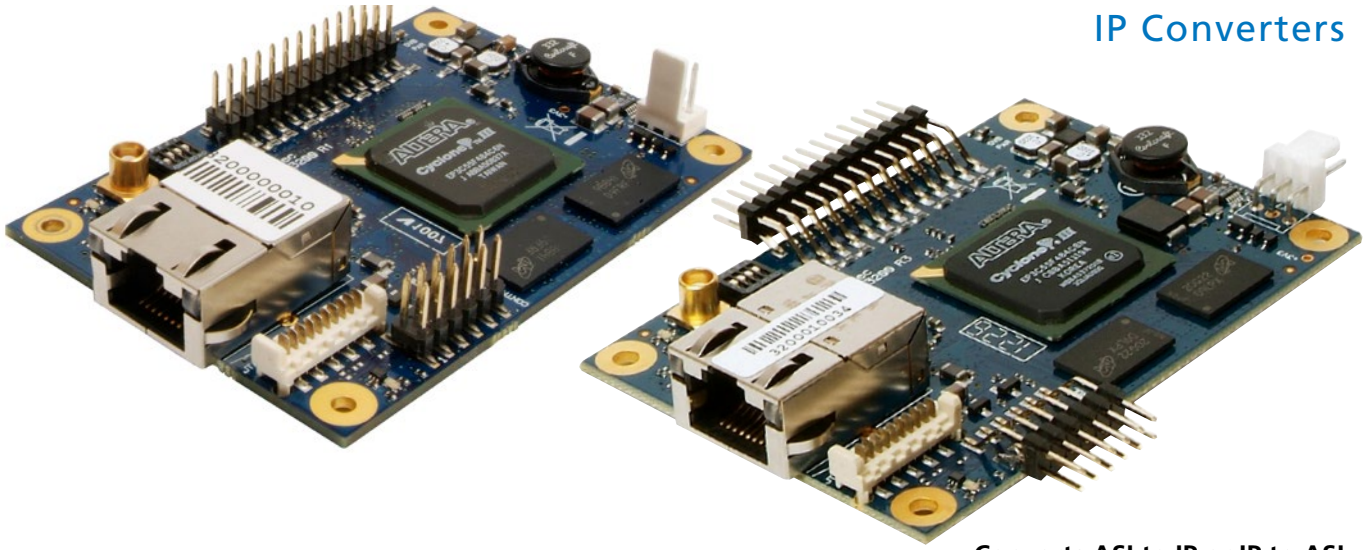
- Mount up to 12 DTE-31XX units in a 19” rack
- Mount another 12 units at the back side

DTE-STAND
Table Stand for DTE-31XX

- For non-wall mount applications

DTM-3200

OEM Module TS-over-IP Converter



Converts ASI to IP or IP to ASI
Serial and parallel TS port
UDP, RTP, 2D FEC (SMPTE-2022)

Features

- Compact OEM module for interfacing a Transport Stream to a network. The DTM-3200 converts from IP to ASI, or from ASI to IP
- Additional 8-bit parallel Transport Stream I/O port on a 26-way boxed header
- Advanced time-reconstruction algorithm to overcome IP jitter, with programmable size of jitter-tolerance buffer
- Full supports of IP encapsulation and 2D FEC encoding/decoding as described in SMPTE 2022-1/2
- Unicast and multicast IP addressing
- Various serial interfaces available for controlling the OEM module
- Persistent storage of configuration parameters

Applications

- Easy way to add a TS-over-IP input or output to your TS-processing product
- Tunnelling of ASI signals over LAN, WAN or the Internet

Development Kit

- DTM-3200 module
- Power supply with cable
- USB to serial converter

Key Attributes

Parameter		Value
GigE port	Physical layer	IEEE 802.3a
	Data rate	100/1000
	Connector	RJ-45 with LEDs
DVB-ASI port	Physical layer	EN50083-9
	Connector	1x 75-Ω MCX
	Tx bitrate	0.01 to 214Mbit/s
Parallel port	Physical layer	M-LVDS
	Signals	Clock, sync, valid, 8-bit data
	Connector	26-way header
Transport	TP per IP	1 to 7
	Encapsulation	UDP or RTP
	FEC	SMPTE 2022
TS-over-IP to ASI latency*		1ms
Jitter tolerance range		1 to 500ms
Dimensions WxHxD		80x55x14mm

* Excluding FEC reconstruction and jitter tolerance delay.

IP Protocol Support

Encapsulation	IEEE 802.2 SNAP, Eth. II
IP support	IPv4
IP-address assignment	DHCP, link local or static
Multicast support	IGMP v2
Device management	Out of band: RS-232, RS-422, RS-485, I2C
Network management	Not supported

DTM-3224

Standalone OEM Module Quad ASI to IP Converter

Quad ASI to Gigabit Ethernet conversion
Serial control over USB, I²C or RS-232
UDP, RTP, 2D FEC (SMPTE-2022)

Features

- Compact OEM module for interfacing four ASI transport streams to an IP network
- Encoding and insertion of 2D FEC packets as defined in SMPTE 2022-1
- IP encapsulation with UDP and RTP support according to SMPTE 2022 2
- Unicast and multicast IP addressing
- IPv4 or IPv6
- Supports source-specific multicast
- Choice of three serial control interfaces: USB 2.0, true RS-232 or I2C
- Persistent storage of configuration parameters in on-board flash memory
- Mounting compatible to DTM-3200

Applications

- Tunnelling of ASI transport streams over LAN, WAN or the Internet

Key Attributes

Parameter		Value
GigE port	Physical layer	IEEE 802.3a
	Data rate	100/1000
	Connector	RJ-45 with LEDs
ASI ports	Number of ports	4
	Physical layer	EN50083-9
	Connector	4x 75-Ω MCX
	Bitrate per port	0.1 to 214Mbit/s
	Max. total bitrate	700Mbit/s
Transport	TP per IP	1 to 7
	Encapsulation	SMPTE 2022-2
	FEC	SMPTE 2022-1 up to 20x20
Power supply requirement		12V±10%
Dimensions WxHxD		80x55x14mm

IP Protocol Support

Ethernet encapsulation	IEEE 802.2 SNAP, Eth. II
IP support	IPv4, IPv6
IP-address assignment	DHCP, DHCPv6, link local or static
Multicast support	IGMP v3, MLDv2
Device management	Out of band: RS-232, USB 2.0, I2C
Network management	Not supported

Ordering Information

Type	Description
DTM-3224	OEM Quad ASI to IP converter
DTM-3224-DEVKIT	Development kit for DTM-3224

DTM-3237

OEM DVB-S2 Receiver with DVB-ASI Output

Converts DVB-S2 to DVB-ASI
Compact and low-cost OEM module
Supports 32APSK, MIS, GS, VCM, ACM

Features

- Compact OEM module for receiving DVB-S2 or DVB-S and outputting it as DVB-ASI
- All DVB-S2 modulation types can be demodulated: QPSK, 8PSK, 16/32APSK
- Supports advanced DVB-S2 features including VCM, ACM, Multiple Input Streams (MIS) and Generic Stream (GS)
- Reception and forwarding of transport streams or baseband frames (BBFRAMEs)
- Extraction of Satellite Delivery System Descriptor information such as Orbital position and Polarization
- Full LNB support with DiSEqC interface and 13V/14V/18V/19V 500mA supply
- Signal quality indicators include lock status, RF level, modulation type, code rate, BER, MER
- Serial control of the OEM module through USB, I2C or LVTTL RS-232
- Persistent storage of configuration parameters

Applications

- Low-cost receiver module for satellite to cable transcoders
- Satellite data distribution
- Monitoring of satellite signal quality
- In combination with DTM-3200: DVB-S2 (or DVB-S) to TS-over-IP conversion

Key Attributes

Parameter		Value
Antenna input		75-Ω MCX Female
Input return loss		>9dB @ 1 to 2GHz
Tuning range		950 to 2150MHz
Input sensitivity		-60 to -30dBm
Baud rate		2 to 45MBd
Modulation standard		DVB-S2, DVB-S
Metrology	RF level	-60 to -30dBm ±5dB
	MER	0 to 22dB ±2dB
	BER (DVB-S)	Pre Viterbi; Pre RS
	BER (DVB-S2)	Pre/Post LDPC & BCH
LNB supply		13V/14V/18V/19V 500mA
DVB-ASI port	Physical layer	EN50083-9
	Connector	75-Ω MCX Female

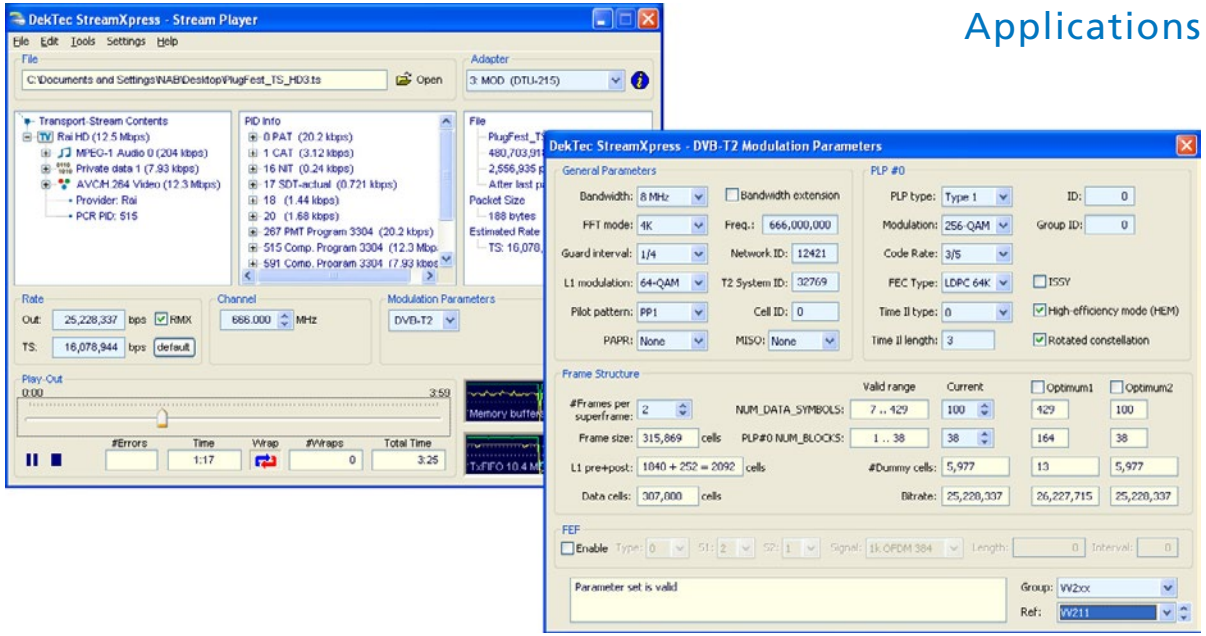
StreamXpress®

Transport-Stream/SDI Playout Software



Industry-standard player
Selective error injection
Integrated (P)SI viewer, looping

Features

- Integrate yourself a low-cost, high-performance stream player using a standard- or industrial PC, a DekTec output adapter and the *StreamXpress*® playout software
- Integrated (P)SI viewer
- Control of modulation parameters
- Optional channel modeling of RF output signal
- Integrated ISDB-T hierarchical multiplexer
- Supports DTA-Plus RF attenuator
- Play-out at a higher rate by null-packet stuffing with PCR correction
- Endless play with optional automatic correction of continuity-counter and PCR/PTS/DTS fields
- Automatic computation of transport rate
- Reproducible injection of errors in the transport stream with adjustable error rate
- SOAP-based remote control option

Applications

- Universal MPEG-2 stream generator for feeding set-top boxes, digital-video processing equipment, etc.
- Demoing your MPEG-2 equipment
- Laboratory MPEG-2 test-signal generator

Supported Output Adapters

Signal Type	Supported Adapters
DVB-ASI	DTA-105, 112, 115, 145, 160, 2136, 2137C, 2142, 2144B, 2145, 2152, 2160, 2174, 2179, 2195 DTE-3100, DTU-205, 245
DVB-SPI	DTA-102, 2142
HD-SDI	DTA-2152, 2174, 2179, 2195 DTU-350
3G-SDI	DTA-2174, 2179, 2195
Modulators	DTA-107, 110, 111, 112, 115, 116, 117, 2107, 2111, 2115B DTU-215, 315
TS-over-IP	DTA-160, 2160, 2162 Local NIC

PC Requirements

Platform	Windows 7, 8, 10
Processor*	PIII (ASI) to Core 2/Core i7 (DVB-T2)

* Or equivalent AMD processor

Ordering Information

Type	Description
DTC-300-SP	*StreamXpress*® playout software
DTC-300-DGL	*StreamXpress*® license on a USB dongle for local NIC playout
DTC-302-RC	Remote control option
DTC-305-CM	*XpressSim* channel-modelling option for modulators

StreamXpert® v2

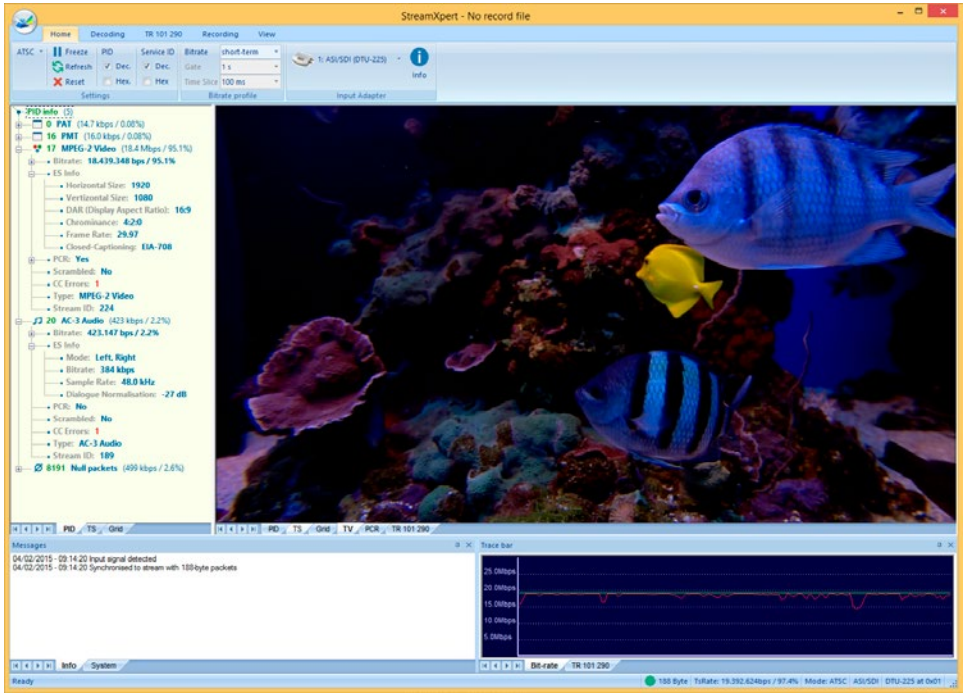
Transport-Stream Analyser Software

Features

- Real-time and offline analysis of transport streams with intuitive user interface
- Provides detailed statistics on PIDs, services and tables found in the transport stream
- Deep decoding of PSI, DVB-SI, DVB-RCS and ATSC-PSIP tables and descriptors
- User-definable TR 101 290 templates
- Integrated video decoder for MPEG-2 video, AVC/H.264, AVS and HEVC/H.265, with support for 4:2:2 and 10-bit video
- Integrated audio decoder with support for MPEG-1 layer II, (HE-)AAC, Dolby Digital (AC3) and AC4
- Analysis of TS-over-IP streams via a DTA-160, DTA-2160, DTA-2162 or a local network adapter
- Decoding and display of closed captions
- The world's most cost-effective and user-friendly MPEG-2 transport-stream analyser

Applications

- The world's most cost-effective and user-friendly transport-stream analyzer
- Test and validation of equipment with transport-stream output, e.g. multiplexers
- Quality monitoring of MPEG-2 transport streams in studios, head ends, etc.



Supported Input Adapters

Signal Type	Supported Adapters
DVB-ASI	DTA-112, 115, 116, 117, 124, 145, 160, 2142, 2144B, 2145, 2152, 2160, 2174, 2179, 2180 DTE-3120, DTU-225, 245
DVB-SPI	DTA-122, 2142
Receivers	DTA-2131, 2136, 2137C, 2138B, 2139 DTU-236A, 238, DTE-3137
TS-over-IP	DTA-160, 2160, 2162, PC NIC

PC Requirements

Platform	Windows 7, 8, 10
Processor*	Core i5 (HD-AVC decoding)

* Or equivalent AMD processor

SdEye
Real-Time SDI Waveform Monitor

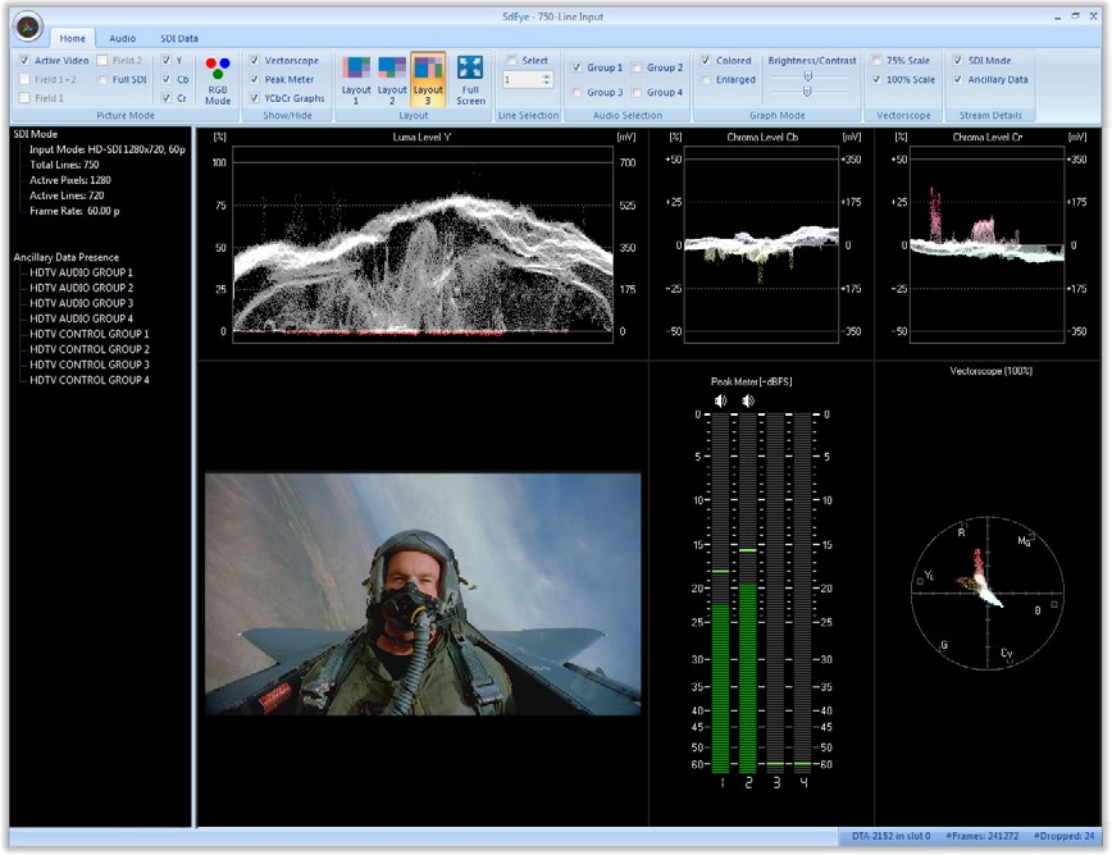
General Features
- Real-time waveform analyser for SD- and HD-SDI signals
- Support for 4K video
- Contemporary GUI with quick access buttons
- Support for .dtsdi file input
- EDH/CRC error detection
- Stream out to SDI for monitoring
- SDI data logging to a CSV log file

Picture Display
- Top, bottom, interlaced, full frame
- Separate Y, Cb, Cr or RGB channel display

Waveforms
- Y,Cb,Cr or RGB graphs
- Vectorscope
- Single line selection

Audio
- Audio decoding/display
- Peak meter (up to 16-channel display)
- Stereoscope

SDI Ancillary Data
- List of all ancillary data streams
- Display of SDI data words with user selectable row and column
- Hex or decimal, 8 or 10-bit display



Key Attributes

Parameter	Value
Input signal	SD-SDI: SMPTE 259M HD-SDI: SMPTE 292M 3G-SDI: SMPTE 424M

Atsc3Xpert, T2Xpert, C2Xpert

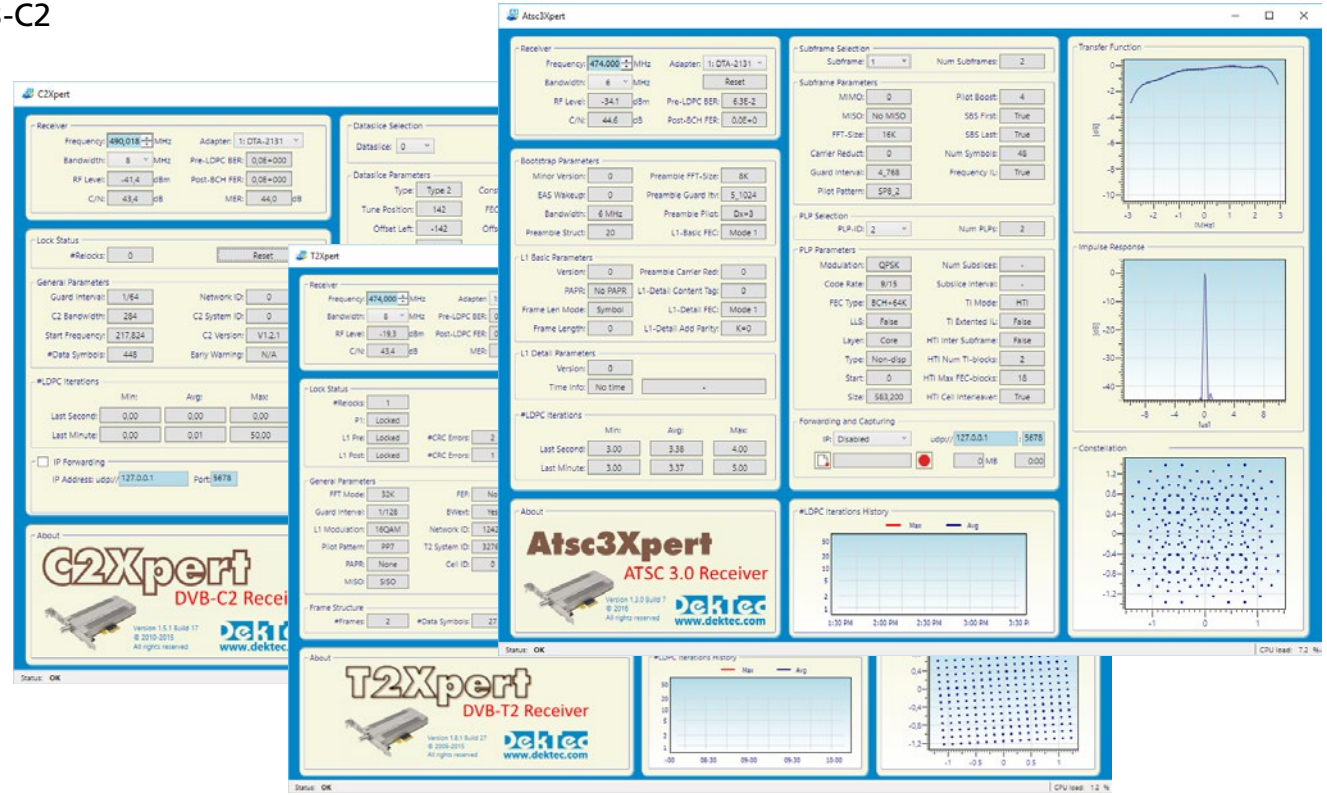
Analysis Software for ATSC 3.0, DVB-T2, DVB-C2

Features

- Real-time reception and analysis of ATSC 3.0, DVB-T2 or DVB-C2
- Displays a comprehensive overview of signaling info
- Outputs a demodulated stream over IP
- Uses the DTA-2131 SDR receiver for PCIe
- Measures RF level, C/N, MER and BER
- Gathers statistics about number of LDPC iterations required to correct all errors and displays LDPC iterations history in a graph
- Advanced statistics including constellation per PLP, impulse response and transfer-function graphs

Applications

- Measurement and analysis of all aspects of ATSC 3.0, DVB-T2 and DVB-C2 signals
- Demonstrations and field trials



Atsc3Xpert Key Attributes

Standard	ATSC 3.0 A/322
Bandwidth	6, 7, 8 MHz
Fields in GUI	RF level, C/N, BER, MER, Lock status, Bootstrap parameters, L1 basic parameters, L1 detail parameters, Subframe parameters, PLP parameters, LDPC iterations
Graphs in GUI	Transfer function Impulse response Constellation
Data output	PCAP IP-capture file ALP, ROUTE/MMP over IP

T2Xpert Key Attributes

Standard	DVB-T2, EN 302 755 T2-MI, ETSI TS 102 733
Bandwidth	1.7, 5, 6, 7, 8 MHz
Fields in GUI	RF level, C/N, BER, MER, Lock status, General parameters, PLP parameters, LDPC iterations
Graphs in GUI	Transfer function, Impulse response, Constellation
Data output	TS over IP, TS-MI over IP

PC Requirements

Platform	Windows 7, 8, 10
Processor	Core i7 4th gen. recommended

C2Xpert Key Attributes

Standard	DVB-C2, EN 302 769
Bandwidth	6, 8 MHz
Fields in GUI	RF level, C/N, BER, MER, Lock status, General parameters, Dataslice parameters, PLP parameters, LDPC iterations
Graphs in GUI	Transfer function, Impulse response, Constellation
Data output	TS over IP

Ordering Information

DTA-2131-RXA-SX	DTA-2131 with *Atsc3Xpert, T2Xpert, C2Xpert and StreamXpert®*

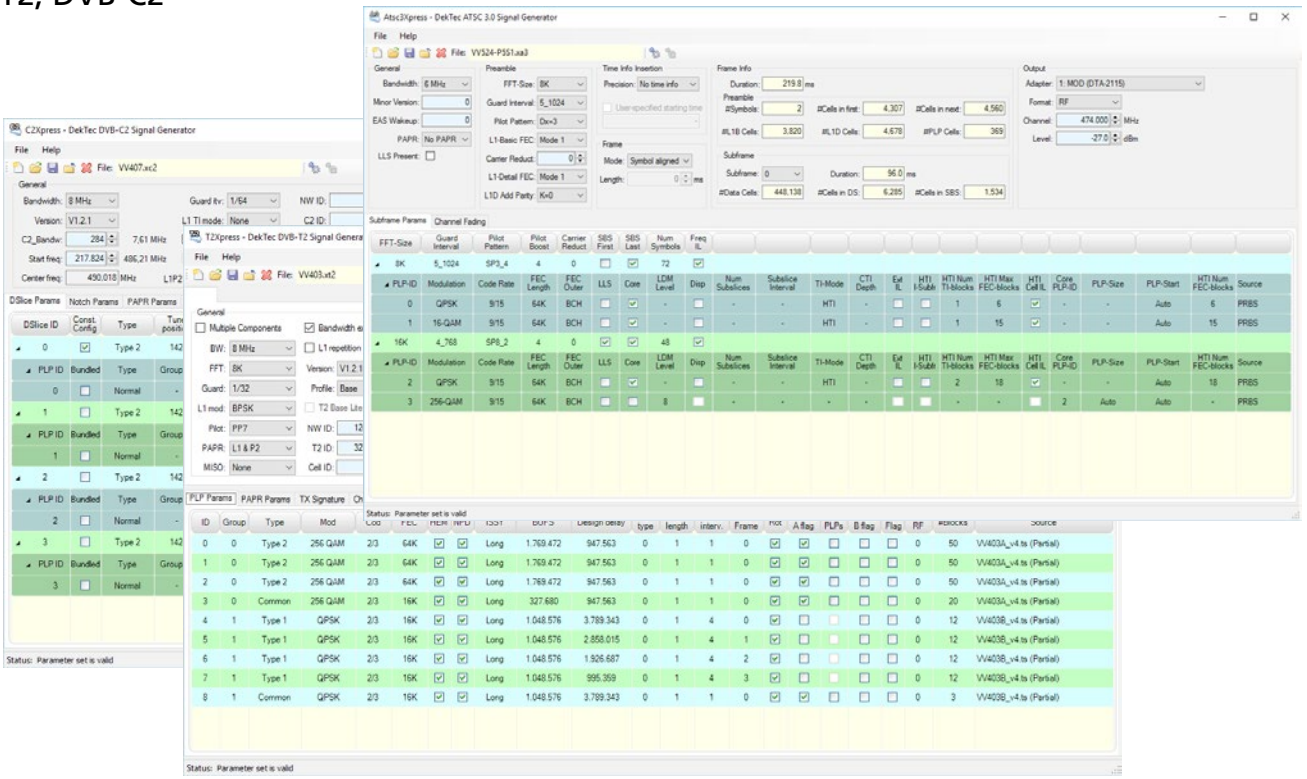
Back to content

Atsc3Xpress, T2Xpress, C2Xpress

Signal Generator Software for ATSC 3.0, DVB-T2, DVB-C2

Features

- Complete multi-PLP modulator with file input and live IP input (Atsc3Xpress only)
- RF output, using DTA-2115B or DTU-315
- With DekTec's DTC-371-IQ option: Offline generation of I/Q sample files
- Full user control over general, per-PLP and modulation-standard specific parameters
- Built-in O151 PRBS test-signal generator
- Can be used in conjunction with DekTec's DTC 305-CM XpressSim channel simulator with AWGN generator (adjustable SNR), multipath fading to accurately simulate reflections



Applications

- General-purpose test-signal generator for ATSC 3.0, DVB-T2 or DVB-C2
- Receiver chip development, testing and evaluation
- Demonstrations and field trials

Supported Output Adapters

Type	Description	ATSC3	T2&C2
DTA-2111	Multi-standard VHF/UHF modulator for PCIe		Y
DTA-2115B	All-standard VHF/UHF/L-band modulator for PCIe	Y	Y
DTU-215	Multi-standard VHF/UHF modulator for USB-2		Y
DTU-315	All-standard all-band modulator for USB-3	Y	Y

PC Requirements

Platform	Windows 7, 8, 10
Processor	Core i7* recommended

* Or equivalent AMD processors.

Ordering Information

Type	Description
DTC-386-ATSC3	*Atsc3Xpress* ATSC 3.0 signal generator
DTC-378-T2	*T2Xpress* DVB-T2 signal generator
DTC-379-C2	*C2Xpress* DVB-C2 signal generator
DTC-305-CM	*XpressSim* channel-modelling option
DTC-371-IQ	I/Q sample generation option

TmmXpress

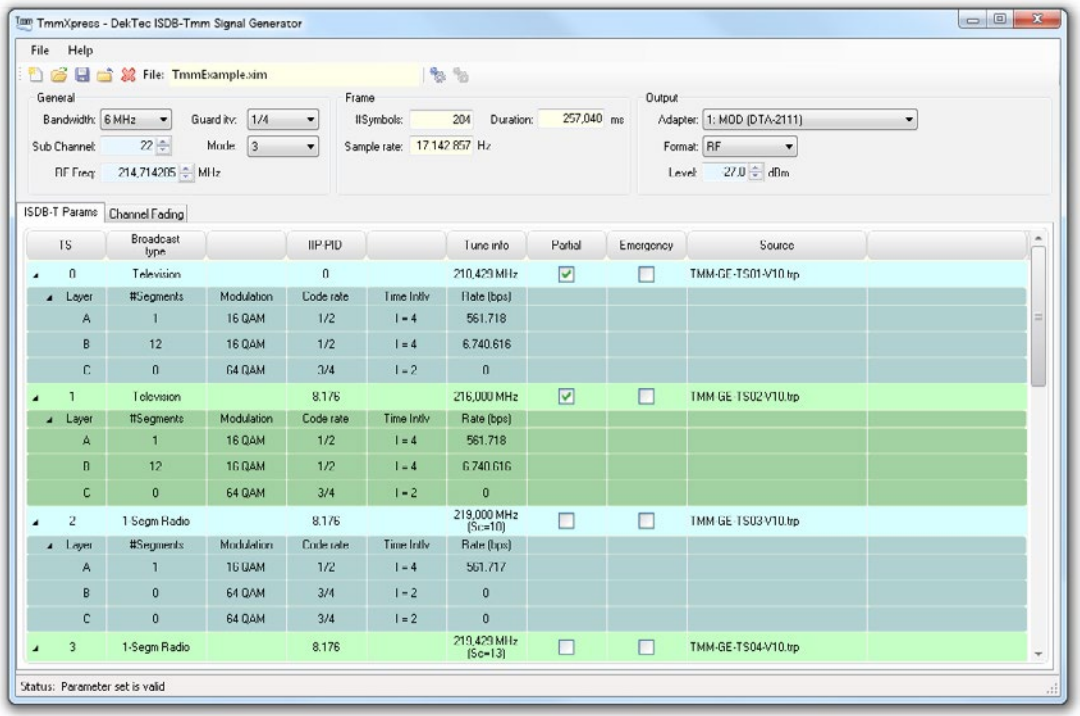
ISDB-Tmm Signal Generator Software

Features

- Complete ISDB-Tmm, TsB or T modulator compliant to ARIB STD-B46, with file input and RF output on e.g. DTA-2111
- 14.5MHz bandwidth (33 segments) on DTA-2111 or DTA-2115B
- With DekTec's DTC-371-IQ option: Off-line generation of I/Q sample files
- Full user control over all ISDB parameters
- Input from Transport-Stream files
- Can be used in conjunction with DekTec's DTC-305-CM XpressSim channel simulator with AWGN generator (adjustable SNR), multipath fading to accurately simulate reflections

Applications

- Test-signal generator for ISDB-T receiver chip development, testing and evaluation
- Signal generator for ISDB-Tmm demonstrations and field trials



Key Parameters

Parameter	Range
Bandwidth	6, 7, 8, 14.5MHz
Guard interval	1/4, 1/8, 1/16 or 1/32
Mode	1 (2k), 2 (4k) or 3 (8k)
Sub channel	0 to 42
Broadcast type	TV, 1-seg or 3-seg radio
IIP PID	PID of the IIP
#Segments	0 to 13
Modulation	DQPSK, QPSK, 16- or 64-QAM
Code rate	1/2, 2/3, 3/4, 5/6, 7/8
Interleaving	0, 1, 2, 4, 8, 16
I/Q format*	Float32, Int16, Text
Real time output	ISDB-Tmm, Tsb, T

* I/Q format requires the DTC-371-IQ option

Related Products

Type	Description
DTA-2111	VHF/UHF modulator for PCIe

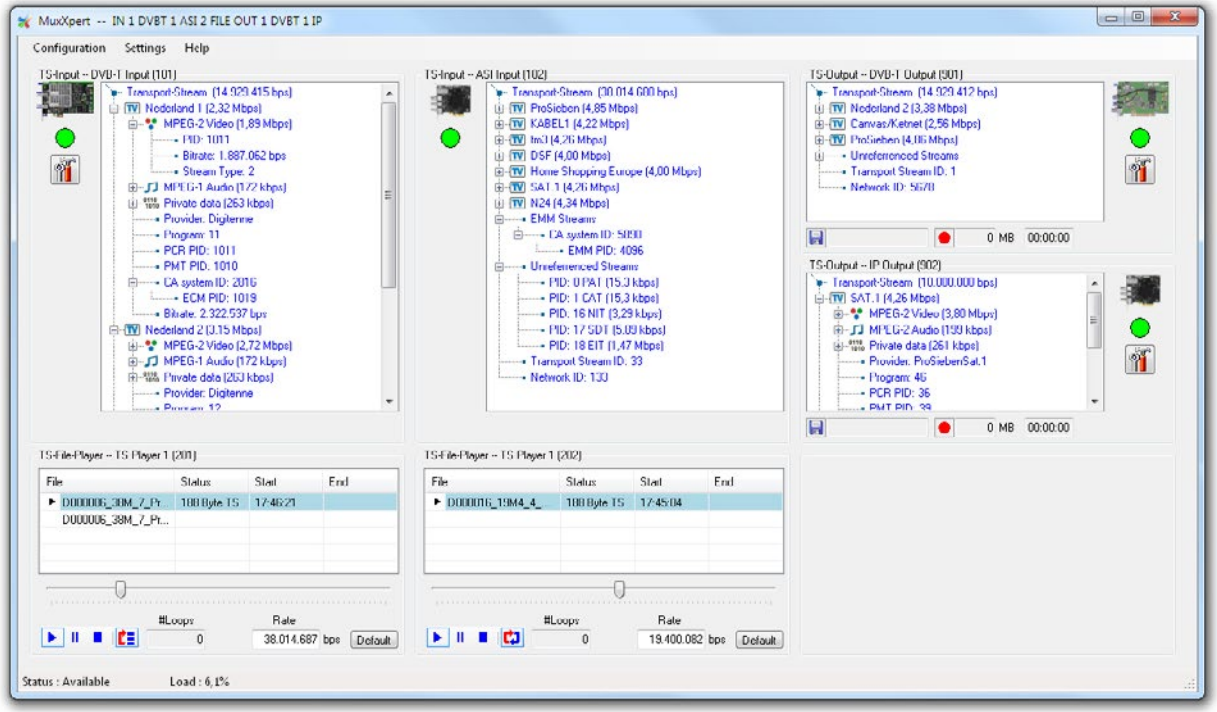
MuxXpert
Real-Time Multiplexer

Features

- Real-time multiplexing and re-multiplexing of live transport streams
- Integrated file players for the insertion of local content from disk into live streams
- Allows re-multiplexing of services and service components from any input to any output
- Automatic PSI and DVB-SI extraction, re-generation and insertion
- Recording of output transport stream
- Monitoring, control and programmatic access to the configuration through the *MuxXpert API*
- Runs on a standard- or industrial PC with all DekTec input and output adapters
- Flexible configuration allows adaptation of PIDs, services, tables, descriptors, etc.
- User interface provides information about services, components and bitrates in the input and output transport streams

Applications

- Master and head-end (re-)multiplexing
- Local program insertion
- Generating transport-stream bouquets
- Creation of fully customized transport streams from files and live feeds



Key Attributes

Parameter	Value
Number of TS inputs	0 to 64*
Number of TS outputs	1 to 64*
Number of file players	0 to 32*
Sum of input rates	0 to 300Mbit/s
Sum of output rates	0 to 300Mbit/s

* Not all combinations are allowed and depend on CPU speed and RAM. A limited number of channels are shown in the UI.

Supported I/O Adapters

Bus	Types
PCI	All DekTec PCI adapters
PCI Express	DTA-2107, 2111, 2115B, 2131, 2136, 2137C, 2138B, 2139, 2144B, 2145, 2152, 2160, 2162, 2174, 2179, 2180
USB	DTU-215, 315, 245*
IP	DTE-3100, 3120, Local NIC

* For evaluation and demos, not recommended for operational use.

PC Requirements

Platform	Windows 7, 8, 10 1GB to 4GB
Processor*	Core i5, i7

* Or equivalent AMD processor

Ordering Information

Type	Description
DTC-700-MX	*MuxXpert* MPEG-2 multiplexer
DTDONG-1-MX	*MuxXpert* license on a USB dongle*

* For using MuxXpert with DTE-3100/3120 and/or local NIC.

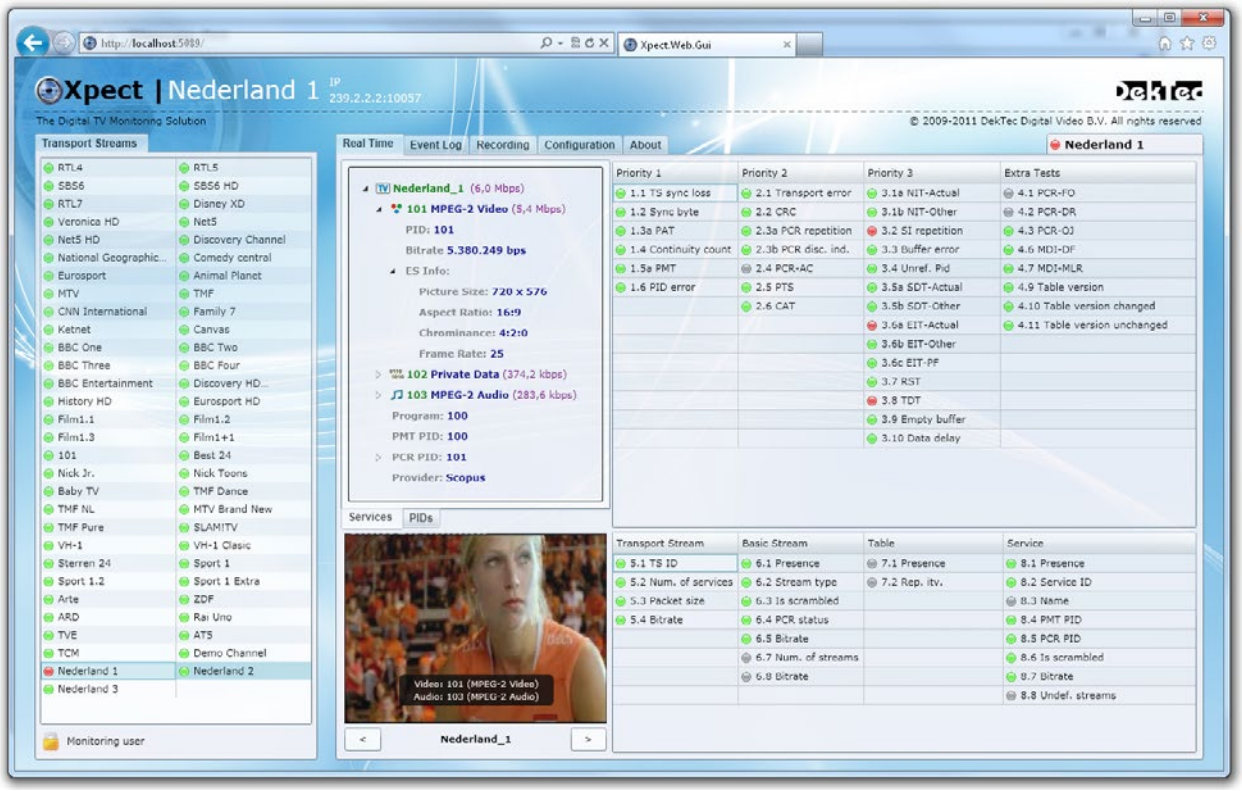
Xpect®
24/7 Transport-Stream Monitoring Software

Features

- Simultaneous monitoring of multiple transport streams
- Mosaic multi viewer included, see DTC-720 Xpect® Mosaic
- Web interface supports live video and audio decoding
- Full TR 101 290 conformance testing
- Freeze frame, black frame, audio silence detection
- Template Matching: Checks properties of services, service components and tables
- Capturing of the monitored transport stream to a file, with pre- and post-trigger buffer, client initiated or triggered by a TR 101 290- or template violation
- Maintains detailed statistic information about bitrates, PCR and IP jitter and packet loss
- Can be integrated with 3rd party monitoring systems for 24/7 network supervision
- SOAP and SNMP interface for remote control and automated access to statistics and error-event database
- Web interface for remote configuration and access to event log and statistic information
- Includes configuration tool for easy creation of templates and TR 101 290 profiles
- Forwarding of transport stream over IP for remote real-time analysis or viewing
- Template matching for DVB/telextext subtitles, closed captioning and SCTE-35
- Export event log to a CSV file

Applications

- 24/7 Network supervision
- Automated equipment test and validation



Supported Input Adapters

Signal Type	Supported Adapters
DVB-ASI	DTA-145, 160, 2144B, 2145, 2152, 2160, 2174, 2179 DTE-3120, DTU-225*, 245*
DVB-S/S2	DTA-2137C, DTE-3137
DVB-T/T2/C/C2	DTA-2138B
ISDB-T	DTA-2131
QAM	DTA-2136, 2139
TS-over-IP	DTA-160, 2160, 2162 Local NIC

* For evaluation and demos, not recommended for operational use

Key Attributes

Parameter	Value
Typical #TS that can be monitored	40 MPTS @ 40Mbit/s 250 SPTS @ 6Mbit/s
Platform	64-bit Windows 2k8/7/8/10

Ordering Information

Type	Description
DTC-720-*n*PT	*Xpect*® monitoring, *n* points*
DTC-720-DGL *n*PT	*n* points* on a dongle
DTC-7201-YR	1 year of software maintenance

* Each SPTS Video requires 1/2 point; each SPTS Audio requires 1/4 point, each MPTS requires 4 points

Back to content

Xpect® Mosaic
Multi Viewer

Features

- Creates an easy-to-oversee mosaic of decoded video, sub titles, audio bars and monitoring status
- Software-based solution that runs on standard PC hardware
- Supports MPEG-2 and AVC video, SD and HD
- Loudness indicators compliant to EBU R 128
- Multiple subtitles support for DVB, Teletext and CC
- Picture cells with custom contents
- Customisable clock
- Alarms from the Xpect® monitoring core can be visualized in the mosaic using LED indicators or a red border
- Customisable XML templates to change size and position of each display element, as well as colours, text font, etc.
- Supports multiple DekTec input devices to combine e.g. ASI and IP inputs
- Graphics card acceleration
- HDMI/DVI/xVGA output using standard PC graphics card or HD-SDI using DTA-2152
- Support for multiple mosaic screens
- Remote configuration tool for easy definition and uploading of a mosaic
- Predefined mosaic layout or fully customisable using 'drag and drop'
- Dynamic mosaic updates using SOAP interface, like service switching and text overlay

Applications

- Control room monitoring
- Impressive display of the services generated or received in your facility
- Fully customisable OEM multi viewer

Monitored Stream Types

Type	Standard
Audio	MPEG-1
	MPEG-2
	AC3
	(HE-)AAC
Video	MPEG-2
	AVC/H264
DVB subtitles	EN 300 743
Teletext subtitles	ETS 300 706
Closed Captioning	EIA/CEA-608-B
Status	TR 101 290
	Template status

Key Attributes

Parameter	Value
Performance indication example for 64-bit Win 7 Intel Core i7 3770*	60x SD MPEG-2, or
	9x HD-AVC, or
	5x HD AVC + 30x SD AVC/MP2V
Platform	64-bit Windows 2k8/7/8/10
Processor	High-end Core i7

* Actual figures could be lower or higher depended on complete PC and Xpect® configuration

Ordering Information

Type	Description
DTC-720-*n*PT	Mosaic functionality is part of the DTC-720 *Xpect*® product; No extra license points are required

DTAPI

Uniform API for DekTec Digital Video Adapters

Features

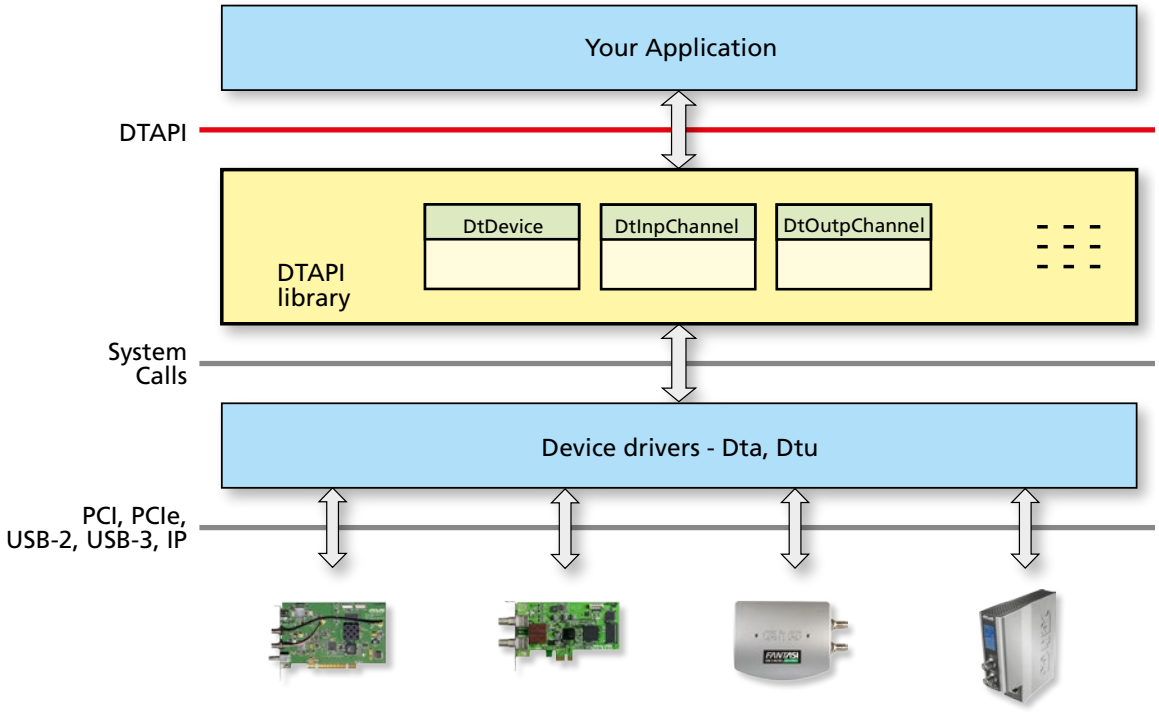
- Common C++/.NET interface to DekTec's line of digital-video interface adapters
- Includes ***DekTec Matrix API***® for manipulating 3G/HD-SDI and ***Advanced Demodulator API*** for RF measurements and multiple stream demodulation
- Applications written for one device will work for any other DekTec device
- Encapsulates the device-driver layer in an easy-to-use object-oriented interface
- Access to all hardware features from user-mode programs
- High efficiency; no need to resort to kernel-mode programming to achieve real-time operation
- Same API classes and methods can be used for PCI, PCI Express, USB-2 and networked devices
- Same API classes and methods can be used on Windows and Linux
- Packaged in a C++ header file (to be included in your C++ project) and a library (to be linked to the application)
- Free download
- Royalty-free redistribution in custom applications

Applications

- Creating custom applications with DekTec devices in a convenient way

Note

DTAPI cannot descramble services



Supported DekTec Devices

Signal Type	Supported Adapters
DVB-ASI	DTA-100, 105, 120, 140, 145, 160, 2160 DTE-3100, 3120
DVB-SPI	DTA-102, 122, 2142
ASI/SDI	DTA-124, 145, 2142, 2144B, 2145, 2152, 2174, 2179, 2195 DTU-350, 351
Modulators	DTA-107, 110, 111, 112, 115, 116, 117, 2107, 2111, 2115B DTU-215, 315
Receivers	DTA-2131, 2135, 2136, 2137C, 2138B, 2139 DTU-234, 235, 236A
TS-over-IP	DTA-160, 2160, 2162
H.264 encoder	DTA-2180

PC Requirements

Platform	Windows 7, 8, 10 Linux ≥2.6.18, 3.x, 4.x
Processor	Any x86 processor

Main Classes In DTAPI

Class	Represents
DtDevice	DekTec device
DtInpChannel	Input channel
DtOutpChannel	Output channel
DtSdi	SDI helpers
DtFrameBuffer	3G/HD/SD-SDI frame buffer
DtSdiMatrix	Matrix of SDI frame buffers

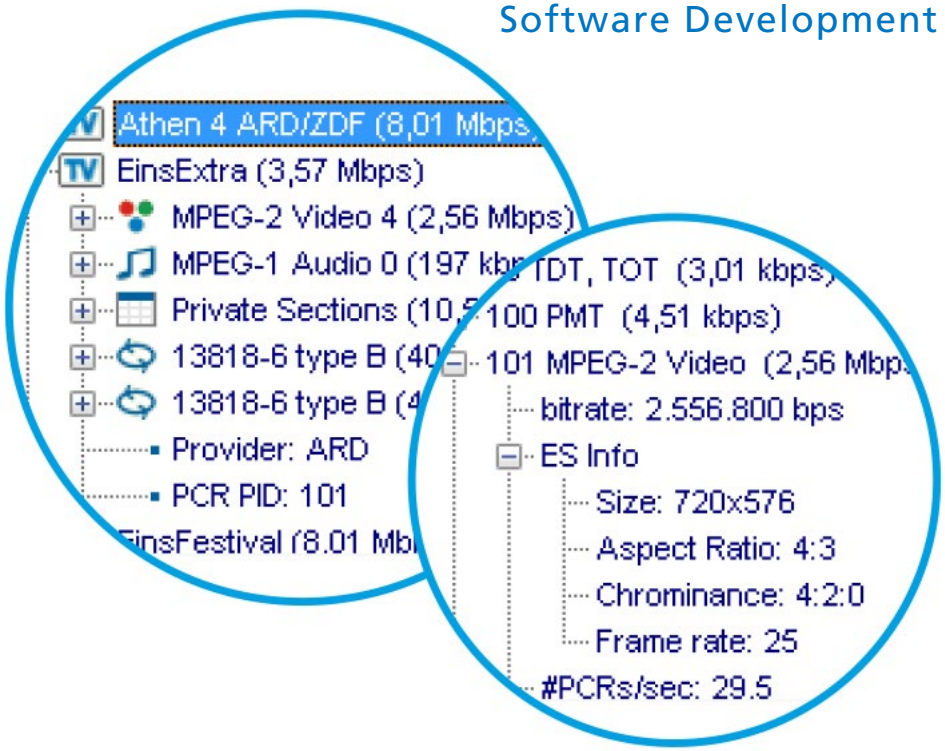
Back to content

DTAPI-TS

Transport-Stream Analysis and Monitoring SDK

Features

- C++ library for adding transport-stream analysis functions to your application
- Get list of services, service info (e.g. name) and elementary stream info (e.g. audio sample rate or video resolution)
- Bitrate measurement (average/min/max) with programmable sliding window
- PCR analysis with PCR-AC and PCR-OJ
- Full decoding of PSI, DVB-SI and ATSC PSIP tables and descriptors
- User-supplied callback functions can be fired upon certain events, e.g. when table data has changed, when a new PES packet was received, etc.
- Easy to use: (1) supply packets with the NewData() function, and (2) read analysis results from class DtTsData
- Transport-stream data can be supplied from any source: DekTec input card, file, network data, 3rd party hardware
- Single developer and site license available
- Applications developed with DTAPI-TS can be used or distributed royalty free



Service information extraction (DVB/ATSC)
PCR analysis and bitrate measurement
Modest NRE fee; Royalty-free distribution

Applications

Apply transport stream analysis and monitoring to the transport stream input(s) of your application, without writing any parsing code:

- Discover services and streams
- Create TS information display
- Detect transport stream errors
- Get contents of SI tables and/or descriptors

General Info

Platform	Windows, Linux
Language	C++
Threading	Locking mechanism for usage in multi-threaded applications
Compiler	Visual Studio 2010 or later gcc v4.1 or later
Processor	Any x86 processor

Ordering Information

Type	Description
DTC-730-1DEV	DTAPI-TS, Transport Stream analysis SDK, single developer
DTC-7301-YR	1yr software maintenance for DTC 730-1DEV
DTC-732-SITE	DTAPI-TS, site license
DTC-7321-YR	1yr software maintenance for DTC 732-SITE

MuxXpert SDK

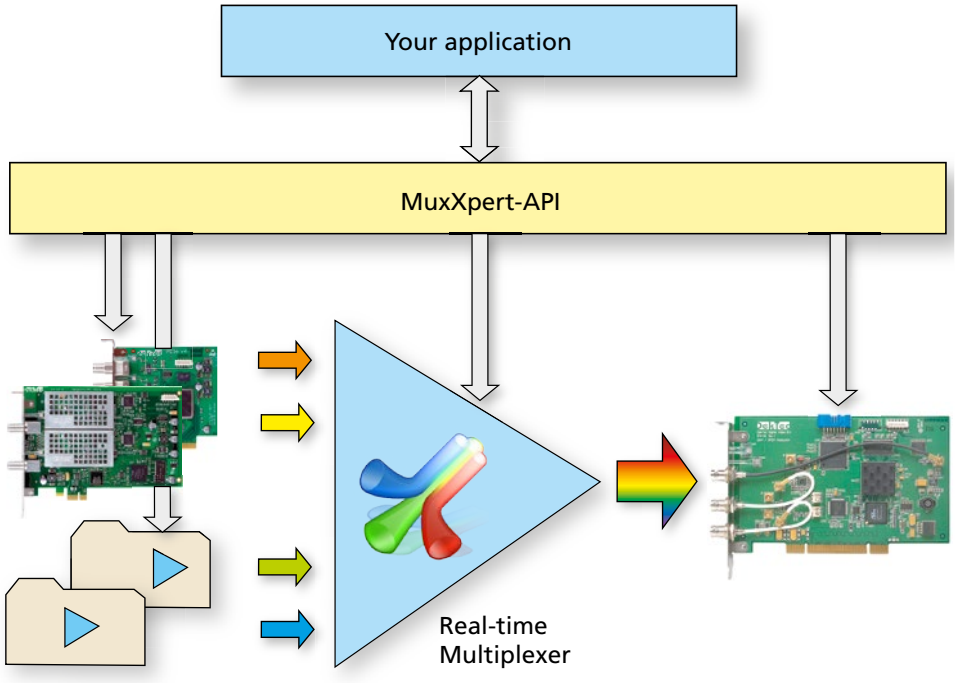
SDK for Creating Custom Multiplexing Applications

Features

- The MuxXpert SDK is a development kit for the embedding of real-time multiplexing functions in your custom application
- The classes can be used to create custom:
  - Service and component selection
  - SI processing
  - Remote control
  - User interface
- Provides all functions of the MuxXpert: re-multiplexing of services and components, querying the structure of transport streams, SI extraction, table cycling, adaptation of PIDs, services, tables and descriptors
- Runs on a standard- or industrial PC with all DekTec input and output adapters
- Can be used from any .NET language such as C++/CLI, C# or VB.NET
- Location transparency: The real-time multiplexing functions running on one PC can be used from anywhere on the network
- MuxXpert SDK consists of one DTC-700-MX MuxXpert license, one DTC-705-MR run-time license, manual and help file, merge module and four hours of premium support

Applications

- Re-multiplexer with custom SI processing
- Electronic Program Guide inserter
- Generation of MuxXpert configuration files



Key Attributes

Parameter	Value
Number of TS inputs	0 to 64*
Number of TS outputs	1 to 64*
Number of file players	0 to 32*
Sum of input rates	0 to 300Mbit/s
Sum of output rates	0 to 300Mbit/s

* Not all combinations are allowed and depend on CPU speed and RAM.

Supported I/O Adapters

Bus	Types
PCI	All DekTec PCI adapters

Distributors

DekTec products are shipped worldwide. Please direct any commercial enquiries or formal quotation requests to the appointed distributor in your country. A list of officially appointed distributors is provided in the contact section of our website. If no distributor is listed for your country, you can email directly to info@dektec.com.

Open Pricing

DekTec operates an open pricing policy. You can find the latest prices of each product on our website. Distributors shall not charge a price that exceeds the DekTec published price, but please beware that local prices may slightly exceed the published prices to account for customs duties and currency exchange-rate fluctuations.

Credit Card Payment and Shipment

For urgent product requirements, DekTec accepts payment by credit card (VISA and MasterCard). Shipment is worldwide by FedEx International Priority shipment, or by your preferred courier.

DekTec - The OEM Supplier

DekTec is a leading supplier of OEM components for integration in your solution. DTAPI, DekTec's critically acclaimed SDK, provides comprehensive support that reinforces the OEM-friendly nature of our products. We provide the SDK free of charge without NDA or complex registration requirement.

Extensive Range

Most of DekTec's product range in this catalogue is suitable for OEM, including the USB products that can be supplied as an assembled PCB board only. By keeping the products standard we can keep the cost of the OEM low, along with immediate stock availability.

DekTec's OEM Minimum Order Quantity = 1

For integrators and OEM's requiring small quantities, e.g. for development of your solution or for a test run, DekTec units are available in single quantity immediately from stock.

Custom Branding

We will consider custom branding to meet specific OEM client requirements, subject to a minimum order quantity.

Warranty

DekTec's hardware is supported with a no-quibble two-year worldwide warranty. This period can be optionally extended up to seven years to provide added assurance in your critical applications.

DekTec Software

DekTec software is supplied on a USB flash drive* and via the Downloads section on our website. We provide a utility program DtInfo to help checking proper installation, licensing information, serial numbers and driver version numbers. DtInfo can also be used to install newly purchased licenses. Software upgrades are available freely for a period of one year after purchasing.

* supplied when hardware and software is purchased together.

Pleasure in the job puts perfection in the work.
